

## SmartMotion - New Post-Capture Video Analytics Software

Published on 08/03/15

Ben Software Ltd, in conjunction with Pro Video Analytic Tools, today announced the release of SmartMotion, a new video analytics software product designed to work in conjunction with any video surveillance (CCTV) system. SmartMotion analyses captured footage at blazingly fast speeds, quickly finding events of interest, saving potentially thousands of dollars per year in terms of man-hours spent reviewing captured footage.

London, United Kingdom - Ben Software Ltd, in conjunction with Pro Video Analytic Tools, today announced the release of SmartMotion, a new video analytics software product designed to work in conjunction with any video surveillance (CCTV) system. SmartMotion analyses captured footage at blazingly fast speeds, quickly finding events of interest, saving potentially thousands of dollars per year in terms of man-hours spent reviewing captured footage.

"We are very excited to be teaming up with our development partners at Pro Video Analytic Tools to bring this excellent new software product to the market" said Ben Bird, the director of Ben Software Ltd. "Anyone who owns a CCTV system has experienced the problem of reviewing hundreds of hours of footage after an event has taken place, and this software is the answer."

The main features of SmartMotion are as follows:

- \* Blazingly fast: processes video at up to 1000 fps
- \* Typically 1 hour of video can be analysed in 1 minute
- \* Works with all major video encoding formats
- \* Batch process hundreds of files at once
- \* Multi-threaded to take advantage of multiple CPU cores
- \* Advanced settings to fine-tune detection
- \* Save potentially hundreds of man-hours and thousands of dollars yearly
- \* Runs natively on Windows, Mac OS X and Linux operating systems

Designed for office buildings, retail locations, police departments, city investigators, airports, hospitals, banks: anywhere that generates significant amounts of video footage that will need post-capture analysis after an event has taken place.

Pricing and Availability:

Pricing is set at \$499 (USD) for a single-user license and \$1499 for a site license. A 10-day fully-functional trial version of SmartMotion is available for download.
