

Glow 1.1 for iOS and Apple Watch - Control Panel for Hue Lights

Published on 08/15/15

Independent developer, Tanner Nelson announces the release of Glow 1.1, an important update to his Hue lighting control app for iOS devices, and Apple Watch. Bring new life to your Hue lights with Glow's dynamic scenes. Combine two of your favorite scenes and watch as they fluidly morph between each other. Create and save as many dynamic scenes as you want, you can even choose different speeds. New in this release are dynamic scenes and Party Mode.

New York, NY - Independent developer, Tanner Nelson is proud to announce the release of Glow 1.1, an important update to his Hue lighting control app for the iPhone, iPad, iPod touch, and Apple Watch. Bring new life to your Hue lights with Glow's dynamic scenes. Combine two of your favorite scenes and watch as they fluidly morph between each other. Create and save as many dynamic scenes as you want, you can even choose different speeds. New in this release are dynamic scenes.

Also new in 1.1 is Party Mode. Create an exciting new ambiance with your Hue lights by activating party mode. Choose from three different speeds and enjoy the spectacular light show Glow has to offer. You will find many other small enhancements throughout the application, like the ability to randomize the color of a group of lights, or turn them all off at once.

Version 1.1 is built on the solid foundation of the original. Glow was built from the ground up to be beautifully precise. See the current color of your lights glowing softly behind the interface. Watch your scenes come to life in the app before you are even done creating them. No matter what you do in Glow, every thing looks and feels amazing.
