

unmarked software Releases TextSoap 6.3.1 Update

Published on 09/22/09

unmarked software today announced TextSoap 6.3.1, an update to its text processing utility for Mac OS X. The TextSoap 6.3.1 update is a maintenance release designed to address additional issues reported under Snow Leopard. Whether it is Mail, AppleWorks, BBEdit, or TextEdit, TextSoap provides integration options such as Services Menu support, Shortcut Menu and Application plug-ins.

Vancouver, Washington - unmarked software today announced the release and immediate availability of TextSoap 6.3.1, an update to its text processing utility for Mac OS X. The TextSoap 6.3.1 update is a maintenance release designed to addresses additional issues to improve compatibility with Snow Leopard.

Additional changes:

- * XML documents would not open correctly under Snow Leopard
- * Other text documents could potentially not be recognized by TextSoap under Snow Leopard.
- * TextSoap Scripting Addition is disabled by default under Snow Leopard
- * Removed additional warnings that appeared in Snow Leopard's console
- * Additional tweaks for Snow Leopard were made

Supported Languages:

- * US English

System Requirements:

- * Requires Mac OS X v10.5 or later
- * Universal Binary: Works great on both Intel and PowerPC
- * 14 MB hard Drive space

Take total control of text and its style. Whether it is Mail, AppleWorks, BBEdit, or TextEdit, TextSoap provides integration options such as Services Menu support, Shortcut Menu and Application plug-ins. With a single menu selection TextSoap 6 brings unique processing power to users from within their favorite application.

Pricing and Availability:

TextSoap 6 is available now directly from unmarked software. Pricing for new customers starts at \$39.95 (USD). Upgrades for users of TextSoap 4 and 5 start at \$24.95 (USD).
