

Cardflow+ for the iPad replaces your index cards and flash cards

Published on 09/03/15

Qrayon today introduces Cardflow+ for the iPad, the latest in their line of digital stationery products. Cardflow+ simulates working with collections of index cards organized on a large board. Use them for everything from drafting screenplays and wireframes, to managing projects and task lists. Easily write and draw freehand using smooth, scalable, vector ink, or choose to type. Cards can be flipped over to use as flashcards, and can also contain pictures.

Seattle, Washington - Qrayon today is proud to announce the release of Cardflow+ for the iPad, the latest in their line of digital stationery products. Cardflow+ simulates working with collections of index cards organized on a large board. Use them for everything from drafting screenplays and wireframes, to managing projects and task lists.

You can write and draw freehand using smooth, scalable, vector ink, or choose to type. Cards can be flipped over to use as flashcards, and can also contain pictures. Instantly change the background and color of cards. One unique feature is Magic Arrange: Cards can be automatically arranged in neat rows or stacks simply by swiping with three fingers. This allows you to easily organize large collections of cards the way that works for you.

Cardflow+ uses an advanced version of Qrayon's Inkflow system. You can easily draw behind existing ink, select and separate ink by color (an easy layer system), and even recolor existing ink. Cardflow can also automatically detect simple shapes to help you draw straight lines, squares, and circles. You can export your cards and board as high-resolution cross-platform PDF files to share with your colleagues.

Cardflow was designed to allow you to work with index cards the way you like, without the forest-pulping guilt of paper. You can immediately use your favorite index card hacks, and develop more using the new abilities that the iPad enables.

Enhancements in Cardflow+ include:

- * The ability to draw directly on the board.
- * Full text search
- * Draw behind mode
- * Shape recognizer
- * Fully customizable color palette
- * The ability to insert photos
- * Export to high-resolution PDF
- * Color-select and recolor ink

Device Requirements:

- * Compatible with iPad
- * Requires iOS 8.0 or later
- * 18.1 MB

Pricing and Availability:

There are two editions of Cardflow. Cardflow 1.0 (Standard Edition) is Free and available worldwide exclusively through the App Store in the Business category. Cardflow+ has additional features, and is priced at \$7.99 USD (or equivalent local currency).
