

LinkOptimizer Light for InDesign Adds Resolution, Color Editing Features

Published on 09/07/15

Zevrix Solutions announces LinkOptimizer Light 4.6, a feature update to its workflow automation solution for Adobe InDesign. LinkOptimizer allows users to reduce the size of InDesign links and speed up processing by automatically eliminating excess image data, performing essential image adjustments and convert colors. The new update lets the Light version users access several new features from the full version such as resolution upsampling, color profile conversion, presets sharing and other.

Toronto (ON), Canada - Zevrix Solutions today is proud to announce the release of LinkOptimizer Light 4.6, a feature update to its workflow automation solution for Adobe InDesign. Awarded 4 out of 5 stars by Computer Arts magazine, LinkOptimizer automates complex image manipulation tasks and allows to reduce the size of InDesign links, repurpose them for web and mobile devices, save processing time and reduce production costs.

The new update gives the Light version users access to several additional features from the full version of LinkOptimizer. Users can now perform resolution upsampling, choose Photoshop resampling methods, export and import settings presets, and convert images to specific color profile. The new version also improves the app's performance and stability, and includes numerous bug fixes.

"LinkOptimizer has become an essential part of our workflow," says Peter Blossom of American Cruise Lines in Guilford, Connecticut. "It saves hours of time, tediously replacing and resizing batches of linked images. LinkOptimizer makes our projects so much easier to prep for the printer."

LinkOptimizer offers the following main features:

- * Resize images to match their InDesign dimensions at a target resolution
- * Reduce link size by eliminating excess image data
- * Convert colors and apply ICC profile
- * Merge layers and delete hidden ones
- * Convert image formats
- * Optimize files for web and mobile devices
- * Run a Photoshop Action on each image

At the end of processing, LinkOptimizer reimports images to InDesign at 100% in their precise position. As a result, users can save gigabytes of disk space, accelerate document output, reduce job turnaround and cut costs through faster processing.

Pricing and Availability:

LinkOptimizer can be purchased from Zevrix website for \$259.95 USD (Light version: \$179.95) as well as from authorized resellers and Adobe Exchange. Trial is also available for download. The update is free for LinkOptimizer 4.x users and \$130 to upgrade from previous versions. LinkOptimizer requires Mac OS X 10.6-10.10 and Adobe InDesign and Photoshop CS3-CC 2015. Mac OS X 10.11 will be supported upon release.
