

Travel Cash Tracker - An Innovative iOS App by Golmium

Published on 09/08/15

Golmium Software Inc. announces the release and immediate availability of Travel Cash Tracker 1.0, their spending tracker app for iOS Devices. With its intuitive and convenient user interface, the Travel Cash Tracker app can be used to track multiple places where one would normally keep cash such as a wallet, a hotel safe, or a cash card. The app helps users to have increased awareness about their personal financial situation while traveling, especially regarding cash on hand usage.

Boucherville, Canada - Golmium Software is proud to announce the release of Travel Cash Tracker 1.0, their spending tracker for iPhone, iPad, and iPod touch devices. Most people are not into the meticulous day-by-day bookkeeping of every personal financial transaction they make. At the same time, most people do have the need for increased awareness about their personal financial situation while traveling, especially regarding cash on hand usage.

With this newly released app, a user can easily get the following basic questions answered:

- * Is one running out of money?
- * How much does one spend daily?
- * How much could one spend daily so as to have enough cash until the end of the trip?

With its intuitive and convenient user interface the "Travel Cash Tracker" app can be used to track multiple places where one would normally keep cash such as a wallet, a hotel safe, or a cash card. A traveler starts by setting up a new trip, enters the travel duration, sets up various "cash stash" categories and enters the starting amounts for each stash.

During the trip, the user updates the amounts one has in each stash every day or from time to time. The app will calculate the average spending rate and determines how much one can spend per day so as to have enough money to last until the end of the trip.

At any time, a user can add more cash by recording bank withdrawals, cashing of travelers checks or similar operations. The PRO version, which supports multiple currencies for one trip, will also allow the entry of currency exchange transactions.

To update data on a regular basis, a user can set up daily notifications to be triggered at a particular time of day.

Device Requirements:

- * iPhone, iPad, or iPod touch
- * Optimized for iPhone 5, iPhone 6, and iPhone 6 Plus
- * Requires iOS 8.0 or later
- * Universal Application
- * 20.2 MB

Pricing and Availability:

Travel Cash Tracker 1.0 is free, and is available worldwide exclusively through the App Store in the Travel category. PRO version promo codes for reviews are available upon request.
