

Moving Winds of Jupiter and Space Exploration in New Solar System App

Published on 09/25/15

Virginia based Vito Technology today introduces Solar Walk 2, the next generation of the company's best-selling 3D solar system guide. Redesigned from the inside out, the new Solar Walk 2 is a powerful educational tool at the edge of graphic technology that shows wonders of the solar system seen as never before. Based on real physics and latest photographic data, Solar Walk 2 comes to life with stunning visual effects of planetary atmospheres, solar flares, auroras, and asteroid belts.

Alexandria, Virginia - Vito Technology today is thrilled to announce the release of Solar Walk 2, the next generation of the company's best-selling 3D solar system guide. Redesigned from the inside out, the new Solar Walk 2 is a powerful educational tool at the edge of graphic technology that shows wonders of the solar system seen as never before. Based on real physics and latest photographic data, Solar Walk 2 comes to life with stunning visual effects of planetary atmospheres, solar flares, auroras and asteroid belts to give the space depth and feel that hadn't yet been possible on a mobile device.

In Solar Walk 2 the life of the solar system is presented as a series of events: celestial (solar eclipses, conjunctions, etc.) and man-made missions. Users can see experience the progress of space exploration and see how the planets moved at the time and how they are going to move in the future.

With the new Calendar users can travel with Voyager 1, see how gravity assists helped Cassini get to the outer edges of the solar system, and explore Hubble as if you were right next to it. 60 spectacular 3D models of important space missions and satellites are available in high detail and travel according to their actual coordinates.

The new Solar Walk 2 has visualizations of important celestial events. Users can view any solar eclipse from space as a shadow crossing the Earth and see exactly what regions it covers at what times for each and every eclipse of the covered range.

Solar Walk 2 comes with an interactive Apple Watch app that presents a fun challenge for kids and adults.

Solar Walk App Highlights:

- * Spectacular 3D model of the solar system and the Milky Way Galaxy - you can zoom out and find out exactly how it looks and where we are in it
- * High Resolution Planets - zoom and rotate all planets and satellites to see every crater on the Moon or clouds on Venus - Tap (i) to read info about any object
- * Satellites and missions - detailed 3D models of the most interesting man-made satellites, with info, history, and images
- * Time Machine - how else can you show the laws of nature if not in motion

Language Support:

- * US English, Russian, Chinese Simple (HANS), German, Italian, Japanese, French, Spanish, Korean and Chinese Traditional

Device Requirements:

- * iPhone, iPod touch, and iPad
- * Requires iOS 7.0 or later
- * 320 MB

Pricing and Availability:

Solar Walk 2 (v1.0.0) for iPhone/iPad/iPod touch is \$2.99 (USD). It is available worldwide

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

through the iTunes App Store in the Education category. Review copies are available upon request.
