

## **DynamoLogic Solutions launches Scanify 1.0 for iPhone and iPad**

Published on 10/02/15

DynamoLogic Solutions introduces Scanify 1.0, their new productivity app developed for iOS devices. Acting as a handy shopping companion for the user, Scanify scans, parses and generates QR and Barcodes. The app deciphers the widely used linear and two-dimensional barcodes including QR Codes, Aztec Codes and Data Matrix Codes. The parsed information helps users in a comparative market research to discover the best places that offer the most attractive deals and viable product prices.

Islamabad, Pakistan - DynamoLogic Solutions, leaders in developing intelligent mobile apps, announced today the launch of Scanify, an application for both iPhone and iPad, that scans, parses and generates QR and Barcodes. It also acts as a handy shopping companion for the user. Scanify deciphers the widely used linear & two-dimensional barcodes including QR Codes, Aztec Codes and Data Matrix Codes. The parsed information helps users in a comparative market research to discover the best places that offer the most attractive deals and viable product prices.

Scanify is a perfect shopping assistant as it allows users to directly look up the product reviews, price comparisons across millions of retailers and search for compatible alternatives and accessories while linking to the top-of-the-line online & offline retailers. Users can also make their purchases directly from within the app.

The app contains built-in map browser, SMS sending, email sending, contacts addition, and events addition for the parsed QR Codes. Moreover, the automatic backup feature in the app keeps stock of all the scanned and created codes while simultaneously allowing the user to perform appropriate actions associated with the data directly from the app.

With a diverse range of code parsing and creation options at disposal, Scanify surely promises to up the ante in QR & Barcode scanning. "We believe that Scanify will help the users shop the smart way with a rigorous market analysis at their fingertips," said a spokesperson of DylogicApps. "It is going to be a real game changer and hopefully the next big thing in the realm of QR & Barcode scanning," he added. The developers of Scanify have already commenced work on further enhancements in the app.
