

Zevrix Updates ArtOptimizer for Illustrator - Adds Snow Leopard Support

Published on 09/28/09

Zevrix Solutions today announces the release of ArtOptimizer 2.3, an update to its workflow automation solution for Adobe Illustrator. ArtOptimizer allows to reduce Illustrator job size and speed up processing by eliminating excess image data and performing essential image adjustments. The software lets users save gigabytes of disk space, accelerate file output and cut costs through faster processing. The new version introduces compatibility with Mac OS X 10.6 Snow Leopard.

Toronto (ON), Canada - Zevrix Solutions today announces the release of ArtOptimizer 2.3, an update to its workflow automation solution for Adobe Illustrator. ArtOptimizer eliminates the excess image data of document links and performs essential image adjustments, thereby significantly reducing the size of Illustrator job and reducing output time and production costs.

In order to eliminate excess image data, ArtOptimizer automatically scales the images in Photoshop to match their dimensions in Illustrator, changes resolution according to the target resolution specified, and reimports images to Illustrator at 100%. As a result, the size of Illustrator job can be reduced dramatically - some jobs can shrink in size by half and more.

In addition, ArtOptimizer can automatically convert image colors, apply sharpening filters, merge and delete layers, and run Photoshop Actions during processing. ArtOptimizer improves the workflow of service providers, printers, ad agencies and publishing houses by automating complex tasks and letting users achieve more with minimal resources:

- * Save gigabytes of disk space.
- * Accelerate document output to printer and PDF
- * Save endless hours - and even days - of manually optimizing image size, resolution and formats
- * Save valuable time transferring jobs to outside sources
- * Cut costs through faster processing

The new version introduces compatibility with Mac OS X 10.6 Snow Leopard and addresses several performance and stability issues.
