

## **Instant Backup Now Supports Mac OS X El Capitan: Manual FTP Backup Tool**

Published on 11/30/15

Toronto based Zevrix Solutions today announces Instant Backup 1.8, a compatibility update to its simple and affordable solution to manually back up selected data to FTP and locally. Instant Backup is designed to back up the most important and sensitive active projects and files - the ones users don't want to take any chances with. And FTP backup assures that the data won't be lost in the case of theft, fire or flood. The new version makes Instant Backup compatible with Mac OS X 10.11 El Capitan.

Toronto (ON) Canada - Zevrix Solutions today is proud to announce the release of Instant Backup 1.8.2 a compatibility update to its simple and affordable solution to manually back up selected data online and locally. Instant Backup is designed to back up the most important and sensitive active projects - the ones users don't want to take any chances with. For example, users can back up their files manually after specific changes, without waiting for their scheduled automatic backup. The software is also ideal for the users who prefer to have a password protected copy of their projects on an FTP site, in addition to all their regular local backups.

The new version makes Instant Backup compatible with Mac OS X 10.11 El Capitan and introduces some stability and performance improvements. The update also fixes an issue where incorrect free disk space was reported under on some systems. The update is offered free of charge to the licensed users.

Instant Backup is not a replacement for a complete computer backup system such as Time Machine. The power of Instant Backup is in its simplicity and the ability to securely backup selected projects whenever needed. And FTP backup option provides a secure offsite backup solution protecting users data against theft, fire and other disasters that could affect their hardware.

Instant Backup offers the following key features:

- \* Back up files and folders by simple drag-and-drop.
- \* Specify various FTP and local backup locations.
- \* Back up data as password protected disk image (.dmg)
- \* Specify the number of recent backups to keep.

Pricing and Availability:

Instant Backup can be purchased from Zevrix website for \$9.95 (USD), as well as from authorized resellers. Trial is also available for download. Instant Backup requires Mac OS X 10.5-10.11.
