

## LinkOptimizer for InDesign Adds Image Preview Support on OS X El Capitan

Published on 12/16/15

Toronto based Zevrix Solutions today announces LinkOptimizer 4.9.52, a maintenance update to its workflow automation solution for Adobe InDesign. Awarded 4 out of 5 stars by Computer Arts magazine, LinkOptimizer helps reduce InDesign link size and speed up processing by eliminating excess image data, perform essential image adjustments, convert image formats and more. The new version adds support for image previews on Mac OS X 10.11 El Capitan and introduces several bug fixes and improvements.

Toronto (ON) Canada - Zevrix Solutions today announces the release of LinkOptimizer 4.9.52, a maintenance update to its popular workflow automation solution for Adobe InDesign. LinkOptimizer automates complex image manipulation tasks helping users reduce the size of InDesign links, save processing time and production costs, and repurpose InDesign documents for web and mobile devices.

The new version restores the ability to show image previews in the list of InDesign links analyzed by LinkOptimizer on Mac OS X 10.11 El Capitan. The updated also addresses an issue that prevented users from revealing selected links in InDesign document and fixes an error which could occur when scanning some vector EPS files.

"LinkOptimizer has become an essential part of our workflow," says Peter Blossom of American Cruise Lines in Guilford, Connecticut. "It saves hours of time, tediously replacing linked images, resizing and batch processing. LinkOptimizer makes our projects so much easier to prep for the printer."

LinkOptimizer works automatically with Adobe Photoshop to eliminate the excess image data of InDesign links, perform essential image adjustments and convert image formats:

- \* Resize links to match their InDesign dimensions at a target resolution
- \* Reduce link size by eliminating excess image data
- \* Convert colors and apply ICC profile
- \* Merge layers and delete hidden ones
- \* Convert image formats
- \* Optimize files for web and mobile devices
- \* Run a Photoshop Action on each image

As a result, users can save gigabytes of disk space and hours of optimizing images manually, accelerate document output, reduce job turnaround and cut costs through faster processing.

### Pricing and Availability:

LinkOptimizer can be purchased from Zevrix website for \$259.95 USD (Light version: \$179.95) as well as from authorized resellers. Trial is also available for download. The update is free for LinkOptimizer 4.x users and \$130 to upgrade from previous versions. LinkOptimizer requires Mac OS X 10.6-10.11 and Adobe InDesign/Photoshop CS3-CC 2015.
