

Brain Game University Grows to 37 Multiplayer Brain Games

Published on 01/11/16

PeqApps today announces Brain Game University 5.3, an important update to its popular educational app for iPhone, iPad and iPod touch devices. Brain Game University allows players to invite Game Center friends to play one of 37 different multiplayer brain games. Players compete head-to-head for grades, and a Bachelor of Gaming Arts degree can be earned by maintaining a 2.0 GPA for 120 games. This update adds 3 new games, including Code Breaker, Fifteen and Treys.

Pompton Plains, New Jersey - PeqApps is today proud to announce that version 5.3 of Brain Game University is now available for the iPhone, iPad and iPod touch. This update adds 3 new games : Code Breaker, Fifteen and Treys. Code Breaker is played by trying to guess the correct order and color for a hidden pattern of colored pegs. Fifteen is a sliding puzzle that is played by sliding square tiles using a single empty space until the tiles are in order. Treys is a card game that is played by finding 3 cards that have all the same, or all different, numbers, symbols, color and shading.

"Brain Game University becomes more addictive every time a new game is added." commented Dan Hansen President of PeqApps. "With 3 new games in the latest version, Brain Game University has grown to 37 multiplayer brain games. Our next game, Card Sharp, will be available later this month."

The Brain Game University Curriculum:

- * 2048 - Earn the 2048 tile before the grid fills up
- * 4 Letter Words - Solve a puzzle filled with 4 letter words
- * Arrows Away - Swipe in the direction of the most arrows
