

g-Balls released for iOS - The Game that uses the Gravity Force

Published on 01/15/16

Art Dynasty today introduces g-Balls 1.0, their new game title for iOS devices. Fast, addictive and easy-to-play, g-Balls is a new game that uses the gravity force. As the balls jump out high in the air, tilt your device so that they land back into the holes & get the desired points. Make sure your balls pass through all the colored rings to increase your points so you can get to the next level faster. With over 50 levels and challengers, g-Balls supports Game Center leaderboards & achievements.

Cluj-Napoca, Romania - Art Dynasty today is pleased to announce the release and worldwide availability of g-Balls 1.0 for iOS, a new game that uses the gravity force. The jumping g-Balls! A fast, addictive and easy to play game, which sets the interest to play it over and over again.

The story behind the game is like this: "Welcome to the far future, which looks different from what we know. People discovered new laws of Physics forgetting the old ones. A wiseman decided to recall them. While thinking, he was throwing balls up in the air and they would fall back down and he remembered the gravity force! He was very happy and wanted everyone to learn about this old discovery. But how to do it? So a bright idea came to him and he invented a game. The G-Balls!"

Tilt the device, as the balls jump out high in the air, so that they land back into the holes to get desired points. Make sure your balls pass through all the colored rings, as they appear, to increase your points-pot, so you can get faster to the next level. Just avoid the white rings - they decrease your earned points. Beware of the swallow-tower! The more balls they swallow the faster your game will come to an end. Keep focused, challenge your skills and have some fun!
