IGG Software today announced that its flagship family of iBank products have a new name, Banktivity. The name Banktivity is a result of combining bank + activity, which more closely aligns with IGG Software's products and goals. Banktivity aims to be the most complete personal finance software available for Mac and iOS devices. With the new name of Banktivity replacing iBank, the products will retain their current version numbers to help keep things simple for current users.

Putney, Vermont - IGG Software today announced that its flagship family of iBank products have a new name, Banktivity. The name Banktivity is a result of combining bank + activity, which more closely aligns with IGG Software's products and goals. "IGG Software's financial apps do more than let you look at your finances, they help you to actively manage your finances," says IGG Software's CEO, Ian Gillespie. The new version of Banktivity is free for all existing iBank 5 customers.

iBank was first released in November 2003, where it quickly became known among Mac users as an exceptional personal financial management app. In the 13 years following, IGG Software released an additional four iBank products for Mac, as well developing iBank applications for iOS.
