

## **Auto and Airline Charging Adapter for the MacBook Air**

Published on 10/05/09

QuickerTek today released the Auto and Airline Charging Adapter for all Apple MacBook Air laptops. Users can now travel by land and air longer by using the Auto/Airline Charging Adapter. This simple-to-use device features automobile and airline power adapters to run your Apple MacBook Air. Unlike the Apple charger, QuickerTek's charging adapter recharges the internal battery while you are using the laptop.

Wichita, Kansas - QuickerTek today announced the Auto and Airline Charging Adapter for all Apple MacBook Air laptops. Users can now travel by land and air longer by using the Auto/Airline charging adapter. This simple-to-use device, features automobile and airline power adapters to run your Apple MacBook Air. Unlike the Apple charger, QuickerTek's charging adapter recharges the internal battery while you are using the MacBook Air.

The QuickerTek MacBook Air Auto and Airline Charging Adapter distinguishes itself among other lesser charging adapter products by powering the MacBook Air and charging the internal battery, while in use. All of the standard MacBook Air power options are maintained, including the MagSafe operation. You gain additional power options through a 2.5mm connector allowing access to other QuickerTek power products from solar panels to external batteries. There are additional safety options including a user-serviceable inline 3 amp fuse as well as power filtering. There are no safety sacrifices in using QuickerTek's MacBook Air Auto and Airline Charging Adapter.

There is even enough power to supply the iTouch, iPod and/or iPhone with usable power through the USB port. QuickerTek extends the mobile user experience beyond just the MacBook Air. Automobile functionality is provided via a standard auto power adapter. Users also have a three foot cable which allows additional freedom while connected to external power - whether in a car or on commercial airline.

### Specifications:

- \* MagSafe airline adapter with EmPower adapter
- \* 2.5 mm connector for QuickerTek solar and external batteries
- \* 20 mm Automobile power adapter
- \* Powers and charges the internal battery while in use
- \* Input voltage 12.0 to 16.5v DC

### Pricing and Availability:

Like most QuickerTek products, the MacBook Air Auto and Airline Charging Adapter is backed with a one-year warranty on parts and labor. It is available for only \$89.95 (USD).
