

Koingo Announces Librarian Pro 1.0

Published on 08/30/07

Available for download September 1st from the business' web site, this \$29.95 shareware product allows users to inventory their home media collection. Compatible with Mac and Windows, Librarian Pro keeps track of Books, Music, Movies, PC Hardware, Software, and Video Games. Interface directly with Amazon to retrieve item pictures, details, reviews and more.

KAMLOOPS, BC - August 30, 2007 - Koingo Software (koingosw.com) is pleased to announce Librarian Pro! Available for download September 1st from the business' web site, this \$29.95 shareware product allows users to inventory their home media collection. Compatible with Mac and Windows, Librarian Pro keeps track of Books, Music, Movies, PC Hardware, Software, and Video Games. Interface directly with Amazon to retrieve item pictures, details, reviews and more.

Organize items into smart collections by content criteria, create multiple databases for different locations, and even export to HTML or an iPod! Import data into Librarian Pro from any other major industry programs like Delicious Library, DVDpedia, Bookpedia, CDpedia, Gamepedia, iTunes, and even Microsoft Excel (CSV Format). Also, have Librarian Pro scan your hard drive for applications and add all the software titles it finds! Librarian Pro, additionally, features a delicious eye-candy "Gallery" mode to view an entire collection by cover art, which is adjustable by size.

The biggest problem with having a large media collection is remembering who has borrowed what. Librarian Pro offers an account system so it is possible to mark off who borrowed what, when, and in what condition it was at the time. On the Mac OS X version, even import a borrowers list directly from Apple's Address Book - and furthermore, narrow it down to family members only.

Aside from having the sleek built-in integration with Amazon, and an optional in-program shopping cart, Librarian Pro is international. It supports networking with Amazon Canada, USA, United Kingdom, Japan, Germany, and France. The database format is fully UTF-8 compatible for international input and is also interchangeable between both the Mac and Windows versions.

Located in Kamloops, British Columbia, Koingo Software has been providing digital solutions for businesses and individuals since 1994. Their award-winning software is now installed on thousands of personal computers worldwide - seamlessly integrating with a modern lifestyle.

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

Birthing Koingo Games in 1994, the business' owner, Josh Hague, started acquiring knowledge about the industry as fast as possible. By 1999 Koingo Games had transformed into an online business that offered more than simple entertainment titles.

Shortly after renaming to Koingo Software, their first flagship applications were then released: Alarm Clock Pro, Password Retriever, and Contact Keeper. The demand far exceeded their expectations, and they continue today introducing new quality software titles.
