

## Fanatic releases Informant for OS X with Weather, Search, and Attendees

Published on 02/17/16

Fanatic Software announces Informant Release 7, the next milestone of the ground-breaking Calendar/Task app for Mac OS X. Informant for OS X is the most advanced Calendar/Task planner for OS X. With the companion products available on iOS and Android, it's the one app that gives professionals the power to stay truly organized no matter where they are. This is our biggest update that includes Weather, Search, Google Event Attendee support, Drag and Drop, and several hundred other improvements.

Cedar Park, Texas - Fanatic Software today is pleased to announce the release of Informant Release 7, the next milestone of the ground-breaking Calendar/Task app for Mac OS X. Informant for OS X is the most advanced Calendar/Task planner for OS X. With the companion products available on iOS and Android, it's the one app that gives professionals the power to stay truly organized no matter where they are. This is our biggest update that includes Weather, Search, Google Event Attendee support, Drag and Drop, and several hundred other improvements.

"We like to think that Informant is the ideal way to unify your Calendar and To-do lists.", CEO Alex Kac said. "Your time is unified and its annoying to plan your day - and week - when you have to juggle different apps. Informant lets you see the entirety of your life at once. Manage it easily. Across platforms. You aren't tied down to one way of doing things. We designed Informant with over 15 years of productivity experience and that shows in the details."

Current features include:

- \* A stunning interface designed specifically for Mac OS X 10.10 Yosemite and 10.11 El Capitan
- \* Tabbed Interface to switch between different views or even the same views with different filters
- \* Quick Entry allows you to create a hot-key shortcut to quickly create tasks or events
- \* "Focus View" with integrated Day View
- \* Weather forecasts in all calendar views
- \* Full featured Search
- \* Attendee invitations for Google Calendar users
- \* Customizable Days, Week, Month, and Year Calendar Views
- \* A full featured GTD-focused Tasks View with Projects, Contexts, multi-level sub-tasks/checklists and controls to filter and group your tasks
- \* Templates to create common events and tasks quickly
- \* Sync with Apple Calendar, Reminders, Google Calendar and Tasks, Toodledo, and our own Informant Sync
- \* and more

Informant is ideal for any Mac user that requires more power and flexibility than the built-in Calendar or Reminder app on OS X, while supporting the leading productivity services (iCloud, Google, Toodledo, and Exchange) and the mobile devices (iOS and Android) that sync with those services.

The bottom line is that Informant provides our customers with a value and power that are unmatched by any other solution on the market. We are productivity fanatics and we're already hard at work on our next free update for OS X that will bring even more value to all our existing customers.

System Requirements:

- \* Mac running OS X 10.10 or later

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

\* 100 MB free
