

Seasonality Pro Offers Advanced Wind Simulation for the Upper Atmosphere

Published on 02/23/16

Michigan based Gaucho Software today announces Seasonality Pro 1.1, the latest update to its professional weather app developed for iPhone, iPad and iPod touch devices. Seasonality Pro is a powerful tool that allows meteorologists to view and analyze weather model forecast data. Version 1.1 adds a new Particle Mode map layer to show the wind field from the surface to the upper atmosphere, an easy new way to animate maps over a longer period of time, and full support for multitasking on iOS 9.

Mt. Pleasant, Michigan - Gaucho Software today is pleased to announce the release of Seasonality Pro 1.1, the latest update to its professional weather app developed for iPhone, iPad and iPod touch devices. Seasonality Pro is a powerful tool that allows meteorologists to view and analyze weather model forecast data. The latest version adds a new Particle Mode map layer to show the wind field from the surface to the upper atmosphere, an easy new way to animate maps over a longer period of time, and full support for multitasking on iOS 9.

The new Particle Mode feature has been a user-favorite in Seasonality apps for years. The feature animates thousands of particles to show the motion of the wind at the surface. Now in Seasonality Pro 1.1, Particle Mode can be used to display the wind at any modeled level in the atmosphere. This is useful for keeping track of the jet stream and other upper air phenomena.

The time bar has always been a useful way to control what time period is animated on the map. Seasonality 1.1 adds the ability to pinch to zoom in and out on the time bar, so users can easily choose whether they want to animate over hours, days, or anywhere in-between. The app automatically handles loading just enough data to draw the animation rapidly, and makes it easy for users to narrow in on the time period they want to study.

Device Requirements:

- * iPhone, iPad, and iPod touch
- * Requires iOS 8.0 or later
- * 18.7 MB

Pricing and Availability:

Seasonality Pro 1.1 is \$5.99 USD (or equivalent amount in other currencies) and available worldwide exclusively through the App Store in the Weather category. Current customers can upgrade for free.
