

## **Nano Enterprise Management Offers Small Business Management for OS X**

Published on 03/17/16

Kiev-based indie developer, Erziman Asaliyev today announces the release of Nano Enterprise Management for Mac OS X 3.3, an important update to his fully-featured and intuitive management app designed exclusively for small businesses. The app makes it easy to manage purchase orders, sales, suppliers, warehouses, and inventory without any special training. Version 3.3 adds new default values for specifications to goods, shipment and calculations, as well as minor bug fixes.

Kiev, Ukraine - Independent developer, Erziman Asaliyev is today proud to announce the release of Nano Enterprise Management for Mac OS X 3.3, an important update to his fully-featured and intuitive management app designed exclusively for small businesses. This unique application allows small businesses to easily manage purchase orders, sales, suppliers, warehouses, and inventory without any special training. It uses a locally-hosted database, and does not require an Internet connection, so it can be used anytime, and anywhere.

Nano Enterprise Management offers an easy-to-use framework to allow for management of any type of small business. The process of inputting data and generating reports has been refined to be as simple to use as possible, allowing even the busiest owner to easily input and track information about their business.

Nano Enterprise Management offers everything a growing small business needs to manage everything; from orders, to sales, to cashflow. Users can immediately get a feel for using the app, as it includes a sample set of data to work with and use to become familiar with it. Once a user feels comfortable with how everything works, they can clear the sample data out of the database, and begin entering their own information.

"Running a business of any size requires extensive tracking of inventory, sales, suppliers, and more," says the app's developer Erziman Asaliyev. "Nano Enterprise Management offers an easy to setup and maintain method of tracking the data required to run any successful business, and also offers an easy learning curve to get you started tracking your business data without the need for long training sessions, or frantic phone calls to harried support personnel."

### Key Features Include:

- \* Instantly view snapshots of cash, inventory, and orders
- \* Easily maintain an up-to-date record of bank account transactions
- \* Track of sales, suppliers, manufacturing, and warehouses, across all locations
- \* Service bookings
- \* Create and maintain accurate records of clients, products, vendors, and employees
- \* Create custom reports for company finances
- \* View sales reports, instantly viewing bestsellers, margins, and more
- \* Create inventory reports for product on-hand, turnover, and movement
- \* Import and export data to and from Excel or other popular spreadsheet apps
- \* The database is saved locally, so it always works, even with no Internet connection!
- \* The ability to backup data via email or iCloud

With Nano Enterprise Management, configuration of goods and inventory is a simple-to-setup process. Users can easily create a record for complicated goods, such as laptop computers, furniture, or even automobiles. The application walks users through entering information for each inventory item, allowing for the name of the item, a bar code number, the SKU, category of goods and more. Photos of the items can also be included, making it easy to search and receive a visual presentation of items.

Transactions, such as sales and refunds can also be quickly entered, and then searched and reported on. Banking records are also easily entered and maintained using the convenient user interface. Once it is time to view the status of a business, users can instantly view a snapshot of cash on hand, inventory, and orders, as well as track sales, suppliers, manufacturing output, and warehouses. Tracking vendors, customers, employees, and other parties is equally as efficient, offering convenient to access information about all parties related to the operation of a small business.

#### What's New in Version 3.3

- \* The new default value "Automatically add specifications to operation of receiving goods"
- \* The new default value "Automatically add specifications to shipment operation"
- \* The new default value "Calculate the sums of documents from the prices with taxes"
- \* Fixed some minor bugs

Nano Enterprise Management allows anyone to conveniently setup and maintain all the required information to track and report on the activities and health of any small business. Its detailed financial and logistical reports offer a detailed view into current and past operations, allowing the small businessperson to confidently plan for the future.
