

Numerical Audio Releases RP-1 for iOS (AU, IAA, AB, Standalone)

Published on 03/24/16

Numerical Audio announces RP-1 1.0.4 , a highly flexible stereo delay for iOS devices that integrates with everything from AudioBus over Inter-App Audio to AudioUnit Hosts and of course Ableton Link. What's more, RP-1 comes with a solid standalone application that makes real-time effects processing as simple as connecting a USB Audio Interface or Microphone. A wide range of effects are available, ranging from basic slapback and ping-ping type echos to complex modulations and soundscapes.

Stuttgart, Germany - Numerical Audio is proud to announce the release of RP-1 1.0.4, a highly flexible stereo delay for iPhone and iPad that integrates with everything from AudioBus over Inter-App Audio to AudioUnit Hosts and of course Ableton Link. What's more, RP-1 comes with a solid standalone application that makes real-time effects processing as simple as connecting a USB Audio Interface or singing into the internal Microphone.

Features:

- * Two independent delay sections with flexible routing options and effect bypass
- * Long Delay for Echo type effects
- * Short Delay for Chorus, Vibrato & Flanger effects (Mod Frequency from 0.1hz - 10hz)
- * Lowpass and Highpass Filter
- * Delay times from 10ms to 2000ms in free mode
- * Delay times for 1/32th to 4bars when tempo synced
- * Tempo Sync via AU Host or Ableton Link
- * Tap Tempo and Manual Tempo
- * Normal, Dotted and Triplet mode
- * True Stereo Processing
- * Stereo Spread
- * Standalone operation with Mic Input or USB Audio
- * Audio Unit Extension
- * Inter App Audio support
- * Audiobus support
- * Ableton Link support

Requirements:

- * iPhone, iPad, and iPod touch
- * Requires iOS 9.0 or later
- * Universal Application
- * 7.2 MB

Pricing and Availability:
