

My Wedding Planner 4.1 for iOS - Easily Plan Your Upcoming Wedding

Published on 04/06/16

UK based indie developer, Gary George today announces My Wedding Planner 4.1, an important update to his popular lifestyle app developed for iPhone, iPad and now, Apple Watch devices. My Wedding Planner allows you to easily and conveniently arrange information for your upcoming wedding. All the information is only accessible via your device. You also have the option to email out your guest lists, planning checklists or budget items to anyone you need to. Version 4.1 now supports the Apple Watch.

Coventry, United Kingdom - Independent developer, Gary George today is pleased to announce the release of My Wedding Planner 4.1, an important update to his popular lifestyle app developed for iPhone, iPad and now, Apple Watch devices. My Wedding Planner allows you to easily and conveniently arrange information for your upcoming wedding.

If you have an Apple watch paired with your iPhone, My Wedding Planner allows you to easily keep track of the remaining time until your big day. The watch app shows the date you have set for your wedding and also displays the days remaining. All the information is only accessible via your device. You also have the option to email out your guest lists, planning checklists or budget items to anyone you need to. Version 4.1 now supports the Apple Watch.

"Unlike the majority of other iPhone/iPad Wedding apps My Wedding Planner features a beautiful simplistic design with an easy-to-navigate interface," explained Gary George, indie developer. "Instead of trying to cram in 1000 irrelevant things, we have only implemented what we have found to actually be important to the people who use these applications. Before starting the project we carried out a survey to 100 people asking them their opinions of existing methods of mobile wedding planning and using that information we created My Wedding Planner. If you have any ideas or suggestions then please get in touch with us."

Device Requirements:

- * iPhone and iPad (with Apple Watch support)
- * Requires iOS 7.1 or later
- * 36.3 MB

Pricing and Availability:

My Wedding Planner 4.1 is only \$0.99 USD (or equivalent amount in other currencies) and available worldwide exclusively through the App Store in the Lifestyle category.
