

## Open Planet Software introduces Radiant Grid for iOS

Published on 04/21/16

Scottish based developer, Open Planet Software today introduces Radiant Grid 1.0, an immersive, minimalist puzzle game for iOS devices. In Radiant Grid, each level features a grid with a radiant colour scheme. To solve each puzzle you create a continuous path across the grid by lighting up the squares. With 99 increasingly challenging, handcrafted puzzles and a beautiful and calming soundtrack, Radiant Grid will give you hours of relaxing game play.

Inverurie, United Kingdom - Open Planet Software today is pleased to announce the release of a new and immersive minimalist puzzle game Radiant Grid; a new addition to its family of iOS apps which includes Just Press Record and Smoovie.

"Like all the best puzzles, Radiant Grid has a simple but challenging concept," explains designer and developer Gavin MacLean. "To solve each puzzle you create a continuous path across the grid by lighting up the squares. This may sound easy but certain intersections can only be bordered by a particular number of lit squares ... and that's where the skill comes in. As you progress the levels get larger and trickier, and one mistake can lead you down the wrong path!"

"As the name suggests, each level features a grid with a radiant colour scheme that satisfyingly emerges as you progress through the puzzle. To complete the sensory experience, a beautiful and original soundtrack gradually unfolds throughout the game making Radiant Grid as peaceful as it is mentally challenging."

"We really wanted users to have a game they could challenge themselves with but in a really chilled out way. With hours of relaxing game play, Radiant Grid is a great alternative to shooting zombies!"

"The concept is great and the game mechanics are excellent :)" - Daniel Pataki, Smashing Magazine

### Feature Highlights:

- \* A simple but challenging concept
- \* 99 increasingly challenging, handcrafted puzzles
