

## Cipher Fall 1.1 released for iOS - Numerical Puzzle Game

Published on 04/26/16

Indie developer, Konstantin Novik today announces Cipher Fall 1.1, an important update to his math puzzle game for iOS devices. Numerical puzzles are very popular today. Test and improve your math skills and share your success with friends. Tap symbols on the screen to make basic arithmetic calculations to achieve the target value. Less taps you make, higher score you get. Be fast and concentrated! Version 1.1 brings minor gameplay improvements, and a fix for a high scores issue.

Moscow, Russian Federation - Independent developer, Konstantin Novik today is proud to announce the release of Cipher Fall 1.1, an important update to his math puzzle game for iPhone, iPad, and iPod touch devices. Fun for both both for children and adults alike, Cipher Fall is a puzzle game with some arcade features. Players must tap symbols on the screen to make basic arithmetic calculations to achieve the target value. Less taps they make, higher score they get. Also the speed is important too.

The gameplay was inspired by one of the famous movies: The Matrix. Falling symbols and scoring mechanism require players to make fast decisions like in arcade games. A variety of different characters on the screen makes Cipher Fall similar to some hidden object games, a feature of numerical puzzles. The goal of the game is to get the target value making basic math operations. In spite of the simplicity of the core idea, the mix of different genres makes the game process quite fascinating and funny.

"Numerical puzzles are very popular today. Such a game as Cipher Fall has a wide audience," explained Konstantin Novik, product manager. "It allows not only to entertain, but also to train basic math skills in a funny manner so it should be interesting both for children and adults alike."

The overall gameplay is very comfortable. Cipher Fall doesn't impose any time restrictions, so players may take enough time to make decisions. Only their overall score will be lower if the player isn't fast enough. Players may share achievements with their friends in social networks. Version 1.1 brings minor gameplay improvements, and a fix for a high scores issue.
