

Remotix VNC & RDP 6.0 for iOS is out with more than a dozen new features

Published on 05/17/16

Nulana LTD today announces Remotix VNC & RDP 6.0, a huge update to their very popular remote desktop tool developed for iPhone, iPad and iPod touch devices. Remotix VNC & RDP 6.0 is a very fast, secure and feature-packed remote control application. This new release includes, among other things, support for RD Gateway and Swiftpoint GT Bluetooth Mouse, automatic reconnect feature, true multitasking implementation, RDP live resolution & scale change and much more.

Perm, Russian Federation - Nulana LTD today is proud to announce the release of Remotix VNC & RDP 6.0, a huge update to their very popular remote desktop tool developed for iPhone, iPad and iPod touch devices. Remotix VNC & RDP 6.0 is a very fast, secure and feature-packed remote control application. Just look at all these new features that make it even better:

RD Gateway:

This is the most long-awaited RDP feature for business users, finally coming to Remotix.

Swiftpoint GT Bluetooth Mouse:

Nulana and Swiftpoint would like to introduce you to the best travel mouse in the world, The SwiftpointGT. This is a quality and award winning Bluetooth mouse that is comfortable, compact and clever and will now allow you to use your iPad like a computer.

Automatic Reconnect:

If network connect is lost, Wi-Fi goes away, Remotix transparently reconnects to the machine. This is especially useful on iPhones, where top button cuts of all network connections. Auto-reconnect works for both RDP and VNC connections.

RDP Live Resolution & Scale Change:

Single most cool RDP feature since Windows 8.1. RDP automatically fits your iDevice resolution on rotations and toolbar/show hide. Also, you can change the scale of the elements on the fly, without leaving the viewer. Note, resolution and scale change only works on non-server Windows editions, starting from 8.1.

True Multitasking and Full Resolution:

On iPad Pro and iPad Air 2 you can now use Remotix simultaneously with the other apps, thanks to the Slide Over feature. Remotix is now using native resolution for all modern iPhone models, like 6 and 6 Plus.

3D Touch:

On 3D touch enabled devices perform right click using the touch with a little force. This is really, really convenient!

Better Keyboard:

We've improved the on screen keyboard - added more shortcut actions like spotlight, mission control and CAD as well as giving better use for more estate available on the devices like iPad Pro and iPhone 6 Plus.

Spotlight Search and App Shortcuts:

Remotix servers are now searchable by Spotlight. Really fast way to connect to particular computer without finding Remotix app first. Also, recently used servers are added as shortcuts to Remotix app (use force touch on the app icon).

Load-Balancing Configurations:

One more feature for business users - Remotix now supports RDP redirection, used in RD farm configurations.

Better RDP network speed adaptivity:

RDP engine now performs periodic network speed checks while you're connected to automatically tune RDP features for the best performance.

Connection Information Panel:

We've added HUD display of current connection parameters, including current rate, total bytes used and total time connected.

VeNCrypt Authentication:

Remotix is currently the only client (as far as we know) supporting TLS VeNCrypt authentication used by ProxMox and others.

Bugfixes:

- * Addressed the long-standing issue with RealVNC "Invalid protocol message"
- * You can rename "Unsorted" category
- * There are a lot of small fixes here and there, and of course, new bugs

Device Requirements:

- * iPhone, iPad, and iPod touch
- * Requires iOS 8.0 or later
- * 10.0 MB

Pricing and Availability:

Remotix VNC & RDP 6.0 is \$19.99 (USD) and available worldwide through the App Store in the Business category. The update will be free for current users.
