

## **ART Teknika releases iConvolver 1.0 for iOS - Impulse Response Reverb**

Published on 05/19/16

Tokyo based ART Teknika Inc. today introduces iConvolver 1.0, their new app for conveniently utilizing convolution reverb on an iOS device. Using Impulse Response files that records the properties of reverberation from acoustic spaces such as halls and studios, high-grade hardware reverb, spring reverb, speaker cabinets and microphones, iConvolver can reproduce those properties. As iConvolver comes with several Impulse Response files included, you can immediately test out those sounds.

Tokyo, Japan - ART Teknika Inc., a software and content provider, today is proud to announce the release and immediate availability of iConvolver 1.0, their new app for conveniently utilizing convolution reverb on an iOS device. Convolution is an effect that adds sampled reverberative properties to a sound to recreate the original properties of that sound. The data of these reverberative properties are called the Impulse Response, and can record the properties of not only acoustic space but also from such things as hardware and speakers. By recording the properties of reverberation from acoustic spaces such as halls and studios, high-grade hardware reverb, spring reverb, speaker cabinets and microphones, etc. to Impulse Response files, they can be reproduced in iConvolver. As iConvolver comes with several Impulse Response files included, you can immediately test out those sounds.

### **Main Features:**
