

iThinkdiff introduces Njump 1.0 for iOS - New Jumping Game

Published on 05/23/16

iThinkdiff today introduces Njump 1.0, the company's new game title for iOS devices. To avoid enemies and obstacles, players must guide Ninja by making the right jump at the right time. Currently there are six missions, each designed with different kinds of obstacles and enemies. Other than the first mission, all other missions are locked. If the player can score a 15 mile distance in the first mission, then the second mission will be unlocked. All other missions follow the same metaphor.

Melaka, Malaysia - iThinkdiff today is very pleased to announce the release and immediate availability of Njump 1.0, the company's new game title developed exclusively for iPhone, iPad and iPod devices. In Njump, players must guide Ninja by making the right jump at the right time to avoid enemies and obstacles. Players will be challenged by interval complexity, serving to improve their problem solving skills, reflexes and decision taking ability.

There are three types of jumps Ninja can do. When the user taps the screen, Ninja will do a normal jump. While Ninja is above the road, a second tap will make a flying jump. If the player quickly double taps the screen, the Ninja will do a super high jump.

Currently there are six missions. Other than the first mission, all other missions are locked. If the player can score 15M distance in the first mission, then the second mission will be unlocked. All other missions follow the same metaphor. Each mission is designed with different kinds of obstacles and enemies. Some enemies can jump, some can run and some can shoot. So it's a great fun to play the game.
