

## PopChar X 7.5 supports insertion of combined emoji characters

Published on 05/25/16

Ergonis Software today releases PopChar X 7.5, an improved version of the company's award-winning tool for finding and inserting special characters and exploring fonts. With PopChar, thousands of special characters are only a few clicks away. Version X 7.5 adds support for the combined emoji characters, comes with an improved font info view, and offers further enhancements to make insertion of special characters easier than ever.

Perg, Austria - Ergonis Software today released PopChar X 7.5, an improved version of the company's award-winning tool for finding and inserting special characters and exploring fonts. PopChar X 7.5 adds support for combined emojis in the Apple Color Emoji font. These symbols are created by linking multiple emoji characters with a special "zero width joiner" character. Up to eight different characters are needed to create such combinations. For example, the family symbol with a man, a woman, and a boy consists of seven Unicode characters. With PopChar, you do not need to know the required sequences and how to generate them. Just look at the "Combined Emojis" section of Apple Color Emoji and click one of the symbols to insert it in your document.

PopChar X 7.5 furthermore enhances the "Font Info" view, which now contains information about the font format (OpenType, TrueType, PostScript). The keyboard shortcut for opening the PopChar window may now include the enter key, and starting a search for characters no longer requires to select the search field first. PopChar X 7.5 finally adds many further enhancements that improve overall speed and stability. Visit Ergonis Software's website to learn more about the changes in this release and to download a trial copy.

PopChar solves a problem faced by every technologist and multi-lingual worker. Inserting special characters into application documents can be frustrating and results in a steady loss of productivity. With PopChar, thousands of special characters are only a few clicks away. Just pop up the PopChar window, click the desired character, and the character appears in your current document right away.

### System Requirements:

PopChar X 7.5 requires Mac OS X 10.6 or newer and is compatible with OS X El Capitan (10.11).

### Availability and Ordering:

PopChar X can be purchased securely on the Ergonis Software website. The upgrade to PopChar X 7.5 is free for anyone who owns a license for PopChar X 7 or purchased a license for PopChar X 6 on or after March 1st 2014. Upgrade paths are available for customers who purchased their license before that date. For information about purchases, including enterprise licenses, volume discounts, and upgrade pricing offers, see the company's web site. Instead of purchasing PopChar separately, customers can save money by ordering the Ergonis Productivity Bundle, which also includes the text expander Typinator and the keyboard shortcut helper KeyCue.
