

## MailButler Allows You to Schedule Emails in Apple Mail

Published on 05/31/16

Feingeist Software GmbH presents MailButler, the productivity boosting add-on for Apple Mail. MailButler allows its users to schedule an email to be sent at a specific date and time. This functionality helps to fulfill lots of tasks beforehand by writing several emails at once and letting MailButler secure their scheduled delivery later. With its ten various functions, MailButler simplifies, optimizes and streamlines working with emails in Apple Mail in one's daily life.

Berlin, Germany - Feingeist Software GmbH is proud to announce the release of MailButler, the productivity boosting add-on for Apple Mail. MailButler allows its users to schedule an email to be sent at a specific date and time. This functionality helps to fulfill lots of tasks beforehand by writing several emails at once and letting MailButler secure their scheduled delivery later. For example, birthday emails can be composed way ahead of the actual date and sent by MailButler on the exact date that is defined by the user.

MailButler is a personal assistant for efficient and productive work with Apple Mail. With its 10 various functions, it simplifies, optimizes and streamlines working with emails in one's daily life. MailButler already offers such features as:

- \* Email Tracking: allows to know if the recipient has actually opened your email
- \* Follow-Up: allows to schedule a follow-up reminder that will notify you when there is no response to a particular email
- \* Emails To Notes: allows to easily convert emails into notes
- \* Upload to Cloud: allows to effortlessly send attachments independent of their size
- \* Signatures: allows to create beautiful and professionally looking email signatures

The developers at Feingeist Software promise that more new features are planned and will be added to MailButler in future.
