

Saving iPhone iPod Music Back on Mac with PrimoMusic for Mac Giveaway

Published on 06/04/16

PrimoSync, a start-up company focusing on iPhone, iPad, and iPod related software development, today announces the New Release & Giveaway Promo on its first iPhone, iPad and iPod media content manager software - PrimoMusic. As an iTunes alternative for the media files management on Apple devices, this simple and flexible Music Manager software allows users to copy iPhone, iPad and iPod music back to iTunes on a Mac computer.

Chengdu, China - PrimoSync, a start-up company focusing on iPhone, iPad, and iPod related software development, today announces the New Release & Giveaway Promo on its first iPhone, iPad and iPod media content manager software - PrimoMusic. As an iTunes alternative for the media files management on Apple devices, this simple and flexible Music Manager software allows users to copy iPhone, iPad and iPod music back to iTunes on Mac computer; adding new media items to an iDevice without overwriting previous content and even without iTunes; saving iPhone purchases to iTunes library on any computer, etc.

"Despite people rely much more on music streaming subscription services in recent years, Apple mobile devices like iPhone and iPod remain one of the most popular storage media for holding users music, similar to Mac computers and iTunes match" said by Kelly Woods, marketing manager at PrimoSync. "In case users will need rescue plans on their music collection, we designed our PrimoMusic, which allows an option to copying music from iPhone, iPod and iPad back to their Mac computer. We believe its ultra simplicity and super efficiency will make its ways in this competitive market."

The Highlights of PrimoMusic:

#1 - Bring The Lost Music from iPhone / iPod Back to Mac - In case users just got recovered from a system failure, or switched to a new computer, and they would like to rebuild your music collection, PrimoMusic can rescue their Music, Playlists, Movies, TV Shows, Books, Audiobooks, Tones and iTunes U, instantly from iPhone, iPad, or iPod to Mac computer.

#2 - Put Music on iPhone iPod without iTunes - Many users have their favorite music saved on multiple computers, but the iPod, or iPhone, can only be synced with one of them. PrimoMusic helps to transfer music, movies, TV shows, podcasts, and more, right onto Apple devices, without the bother of iTunes. This way, they won't worry about original media content on iPhone, iPad or iPod, get overwritten.

#3 - Rebuild iTunes Library with Playlists, Ratings and More - iTunes probably is the best way to organize and enjoy podcasts, movies, and TV shows, especially music with personalized playlists, ratings and play counts. In case any unexpected "disaster" happens to users' iTunes library, PrimoMusic brings two simple and effective solutions to help you rebuild it up: Smart Transfer (Automatically detects what're the differences between the media library on iPhone / iPod and on iTunes) and Manual Transfer (Allows to select only desired content to transfer).
