

## **ADNX Becomes TinyBinary - New versions of Apps, New Services**

Published on 06/06/16

ADNX announces that beginning June 6, 2016 the company will be known as TinyBinary. The transition is just the first step towards moving the business forward with a new ambition, exciting new goals around services, and better quality at all levels. TinyBinary will continue to offer professional apps based on proven source code, but with new names, and an all new look and feel. The new company will provide ADNX customers with even better service than before.

Portland, Oregon - Development house, ADNX is excited to announce that beginning June 6, 2016 the company will be known as TinyBinary. ADNX customers will find the newly named firm is offering new versions of our much-loved apps and new services. TinyBinary is the first step toward moving the company forward, with a new ambition, new goals around services, and better quality at all levels. The new company is offering new versions of professional apps but with new names, and a fresh new look, and feel.

"When I founded the company fifteen years ago in Lyon, France, it was with the aim of providing users of Apple devices with the best possible software to help them in their day-to-day lives, be it business, or personal, and that is one thing that will never change," says company founder and CEO Patrice Calligaris. "With the transition to TinyBinary, the company promises to provide higher quality apps and new services for entrepreneurs. It's just the beginning of a new era."

While TinyBinary's apps will sport all new names and a fresh look and feel, the new versions of apps offer the same reliability and ease of use. Our apps include:

**tinyGantt (formerly xPlan):** Users can finally create Gantt charts without scratching their heads. The product shines thanks to its ease of use and simplicity. TinyBinary focuses its attention on the features that the majority of project managers actually use.

**tinyBrain (formerly xLine):** Create specialized mind maps, add images to enhance understanding, and more. The app uses a seamless interface and intuitive design to help creativity thrive.

**tinyCheck (formerly xList):** Finally, users can centralize their task lists without having to worry about document management. tinyCheck's strength comes from its ease of use. The app focuses on the main features organized individuals actually use.

**tinyKiosk (Formerly xStand):** Easy kiosk management for the Mac and iPad. Install an internet kiosk in any public place in just minutes. The app's ease of use and reliability offers thousands of customers around the globe the ability to give life to their kiosk projects.

**tinyEye (formerly xScan):** Users can visually see how their computer is functioning and where it's using the most resources. With functional monitoring tools and a natural graphic interface, anyone can be on top of their Mac's behavior at all times

**tinyDuty (formerly xTeam):** Wouldn't it be great to see the allocation of all team members on one simple calendar? tinyDuty offers a simple and beautiful workforce management platform for business owners, managers, and more. With an intuitive design and a laser focus on the most useful features managers use, tinyDuty is sure to change the way users handle their workforce.

It's very important to understand that ADNX customers are not forced to upgrade their

current apps. Users who are happy with previous versions of the apps are more than welcome to continue to use them. TinyBinary will continue providing free technical support for those versions until April 2017. Even after that date, users can continue to use them if they meet their needs. The company will continue to offer download links made available on request for customers who have purchased a license for older versions.

Users who would like to update to the latest TinyBinary versions of the apps will be able to upgrade for either a nominal tiny upgrade fee, or in the case of licenses purchased or converted in 2016, for free. Users can check to find if they're eligible for a free upgrade by using the Upgrade Assistant on the TinyBinary website. The company also offers some bundles on the store section.

"When I immigrated to the United States in 2015, and settled in the beautiful city of Portland, Oregon, it planted a seed in my head about new beginnings," continues Patrice. "Even though both I, and TinyBinary are beginning a new phase of our existence, we will never abandon the principles that got us where we are today. Technology, Simplicity, and User Experience are the words that will always drive the team."
