

CloudlightFPV for Parrot Bebop Released

Published on 06/13/16

Indie Developer Kai Aras is proud to announce the release of CloudlightFPV for Bebop 1.0 for iOS devices, a VR enabled first person view experience that puts the user into the cockpit of their drone. With full support for Zeiss VR ONE as well as all Google Cardboard-style headsets, CloudlightFPV provides a truly immersive experience without breaking the bank. Now also for Parrot Bebop 1 and 2.

Stuttgart, Germany - Available for iPhone today, CloudlightFPV for Bebop 1.0 combines VR and Drones to deliver a true first person piloting experience to anyone with a Bebop drone. Building on the success of the original CloudlightFPV App, this new version adds support for the popular Bebop drones from French manufacturer Parrot.

With CloudlightFPV and a VR headset the pilot is able to see exactly what their drone sees which aside from being an incredible experience on it's own, is a game-changing tool for filmmakers, researchers and industrial applications alike.

Head-tracking senses the pilots head movements and translates them into camera movements in realtime allowing for an even greater level of immersion. A full featured on-screen-display projects telemetry data, battery levels and warnings directly onto the live video stream giving the pilot a real-time status overview of their aircraft. Custom color themes make it possible to adapt the OSD to certain lighting conditions.

Features:

- * First Person View (FPV) optimized for VR headsets.
- * On-Screen-Display (OSD) shows live telemetry data such as battery level, height or camera orientation.
- * Head-Tracking allows to user control the camera by turning or tilting their head. (2 axis on Inspire1 only vertical axis on Phantom)

Supported Platforms:

- * Parrot Bebop with SkyController
- * Parrot Bebop2 with SkyController

Supported VR Headsets:

- * Zeiss VR ONE
- * All Google Cardboard-style headsets

Requirements:

- * A VR Headset
- * One of the supported drones

Device Requirements:

- * iPhone, iPad, and iPod touch
- * Requires iOS 9.0 or later
- * 40.1 MB

Pricing and Availability:

CloudlightFPV for Bebop 1.0 is \$14.99 USD (or an equivalent amount in other currencies) and is available worldwide through the App Store in the Photo and Video category.
