Easily recover your lost or deleted iOS data, no matter if you have iTunes backups or not. With the all-new Cisdem iPhoneRecovery 3, users can easily get back multiple files in their iPhone/iPad/iPod, including lost photos, videos, messages, contacts, call history, Safari bookmarks, notes, calendar and more. Available now for 50% off.

Madelia, Minnesota - Cisdem, one of the leading software developers for Mac, is glad to announce the release and immediate availability of Cisdem iPhoneRecovery for Mac 3.0.0 now. It is an ideal iPhone data recovery software to recover your lost or deleted iOS data, no matter if you have iTunes backups or not. With an intuitive interface, iPhoneRecovery 3 can help easily get back multiple files, including lost photos, videos, messages, contacts, call history, Safari bookmarks, notes, calendar, etc. No more data disaster!

"It is reported that Apple is very highly likely to sell its one billionth iPhone this summer. There is no doubt that iOS devices has become a part of our life for many people." says Karim Roumani, App Director of Cisdem, "Cisdem will keep on developing more and more practical applications for iOS users. The all-new iPhoneRecovery 3 is a good example."

In the version 3.0.0, users can enjoy surprisingly smooth user experience thanks to the following improvements:

Greatly improved performance in recovering lost photos:

- * Exactly find all the lost photos, both the deleted and the undeleted included
- * Recoverable photos can be shown in two methods to preview: thumbnails or lists (categorized by date)
- * The quality of recovered photos can be the same as the original ones

More Accurately find lost Messages, Videos and Contacts in iPhone:

- * All the lost messages can be found out and recovered with names, numbers, receive/sent time and contents
- * Improve the recovery performance of undeleted Videos and Contacts
- * The preview windows have been redesigned to show details more clearly

Other improvements:

- * Brand new UI
- * Improve the speed when scanning the devices
- * Optimize the layout of output files
- * Fix the bug when connecting multiple devices
- * Add support to iOS 9
- * Add support for iPhone 6/6 plus and iPhone SE

Besides, this version also borrows successful elements from the previous versions:

- * Retrieve iOS data lost due to iOS upgrade, jailbreak, accidental deletion, virus attack, restoring to factory settings, etc.
- * Recover messages, contacts, call history, Safari bookmarks, notes, calendar and reminders from iOS device or iTunes backup
- * Export recovered files to HTML, Excel, Word, Numbers, and Pages files for easily backup
- * Preview the files before recovery
- * Selectively recover data that you need
- * Fully support Mac OS X 10.9, OS X 10.10 and OS X 10.11
