

## **Educatia 1.0 - The First Step towards a New Digital Education Platform**

Published on 08/03/16

Bluewave Solutions today introduces Educatia 1.0, the company's new education app for iPad devices. With Educatia, students will be more engaged to work on the same platform which they use for fun every day. Educatia offers a new way for teachers to communicate with their students away from the classroom. The app gives students a way to work directly from their iPad; their internet portal to the information of the world, their word processing tool where they write their assignments and more.

Dubai, United Arab Emirates - Bluewave Solutions today is proud to announce the release of Educatia 1.0, the company's new education app developed exclusively for iPad devices. Educatia 1.0 aims to be the new digital platform for Education, cutting all obstacles for learning.

Current Education Delivery systems are the books, which present an outdated system from the 19th Century. In the 18th and 19th century, the education delivery method was as much fun as the most entertaining delivery method available at that time, which was "to read a book," and based on this a whole system of information delivery has been built around it; starting from teachers who had to sit with students in the same physical location to teach them word by word the content of the book. The changes afterwards came to the physical location itself by making it more sophisticated and inline with the industrial revolution. Each class of the students were labeled by their year of graduation.

The education systems were booming everywhere till the invention of the radio, where the entertainment delivery business got the edge, although radio broadcast was not continuous, and not everybody could afford a radio at that time in the beginning of the 1900s. Then the cinema and TV happened, which is quiet a revolution for the entertainment business which moved the entertainment business into a new level where you can see and listen to the entertainment remotely from where it is happening. This changed the focus of the masses away from the education arena specially that the education delivery method was still using the same method of books.

The accessibility to a cinema or TV became on daily basis easier than the day before TV are getting cheaper, cinema tickets are even cheaper, so more people and more kids are attracted more to entertainment shows away from the education in the traditional books, which causes problems in the education sector.

With the advent of the Internet, this was the "check mate" for traditional books. Students who are keen to learn are no longer looking for information on their books because of the limitations of their information. Students who are not keen to learn are having so much fun with the internet.

The whole system which is based on the physical geolocation of the students and the teacher is the same place and to deliver the information through traditional books is completely outdated & should be replaced immediately. Educatia offers a solution for the whole education system as it stripes Down to the basics of the educational process:

- \* Information Material as Books
- \* Medium to exchange the Information Material

With Educatia , Teachers will be able to:

- \* Create their Own Subjects Course
- \* Send their Subjects Codes to the designated Students
- \* Follow up with their Students through their own news Channel

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

- \* Allow Unlimited number of Students to Follow their Courses
- \* Send Assignments to their Students
- \* Collect Assignments from his Students to make proper assessment

With Educatia, students will be more engaged to work on the same platform which they use for fun every day. Educatia offers a new way for teachers to communicate with their students away from the classroom. The app gives students a way to work directly from their iPad; their internet portal to the information of the world, their word processing tool where they write their assignments and send back to their teacher, their camera where they capture their artwork if the assignment is about artwork and so much more.

The Possibilities are endless in the new digital Educational era , where students can learn and have fun in the same time by facilitating the access of the information and the assessment of the information delivered. Educatia 1.0 offers a new step towards a new revolutionary educational system model where it competes head to head with the entertainment business by using the same delivery medium and same delivery procedure.

Device Requirements:

- \* Compatible with iPad
- \* Requires iOS 9.3 or later
- \* 9.6 MB
