

New Final guitar app makes learning how to play guitar extremely easy

Published on 08/04/16

One Groove Co. Ltd. releases Final Guitar 2.0.0, their all-in-one guitar app for iOS devices. Developed by musicians, this highly interactive app comes with an array of tools to learn how to play guitar like a pro. Simply tap and bend the strings, and you can reproduce that passionate and soulful guitar play that you have been dreaming. It has everything you need for mastering techniques; playing tracks, of course, but also great for practicing scaling, playing by ear - and even improv.

Ogaki, Gifu, Japan - One Groove Co. Ltd. is proud to announce the release of Final Guitar 2.0.0, an update to their popular all-in-one guitar app for iOS devices. Final Guitar offers all the tools that you need to learn how to play guitar. Just like its name suggests, it is the Final Guitar indeed. The app has been made by real musicians for musicians at all levels, from beginner to pro. It is not only unique, it is also highly interactive. All you have to do is bend the strings and you can produce all the different genres that you love.

During the launch, Mikio Fujioka, a famous guitarist popularly known as the 'god of guitar' played the app in the promotional video. This was during a concert called Baby Metal.

The app features playing tracks and is a great option if you want to learn how to scale or play by ear. The slider bar makes repositioning easy, and you can move to any location. The app comes with all the guitar chords that you need to play like a pro. The 3-D environment makes using the array of tools even more captivating. You have complete control over the chords that you want to hear, and even the order in which you want to hear them. The arrangement is played back using a 3-D virtual guitar player.

Using the app is further made easy by the manuals and video tutorials. Get to choose from a menu of all the available chords, sliding them on the musical arrangement in the specific order that you would like them to play. It is possible to change the timing on the virtual guitar play. Section blocks allow you to insert section repeats. You can zoom in and out to get a better view of the virtual guitar. If you want to make the track more musical, you can add drums and bass. The metronome helps you control the speed of the play.

Final Guitar Features:

- * Toggles between numbers and letters - you can hide the marks
- * All key support
- * iPod data import - use the music in the iPod for loop play
- * Practice playing by ear
- * Built-in metronome to control the timing of the chords
- * Guitar synthesizer
- * Mark display for all main scales - for instance, diatonic and pentatonic: these are ideal for learning theories
- * Add blocks of repeated chords
- * Wide range of common BGM tracks - ideal for practicing improvisation
- * Helpful tutorials and video lessons
- * Speed adjustment
- * A to B loop and speed settings - loop play of the segment that you like, in your track of choice, with your choice speed
- * The pinch and zoom feature allows you to get a closer look at how the chords are being played
- * Wide variety, high-quality guitar sound

* Chords are played via a 3-D virtual guitar player

The people who have already used the app are very much pleased by its interactive interface. The developers are very much confident about its popularity. It is already the #1 app in Japan. Version 2.0.0 comes with additional features like selection of the number of frets, the notes in each chord can be displayed on the fingerboard in lesson mode, and a monophonic mode, where only one note is played at a time.

Device Requirements:

- * iPhone, iPad, and iPod touch
- * Requires iOS 6.1 or later
- * 49.0 MB

Pricing and Availability:

For a limited time, Final Guitar 2.0.0 is only \$0.99 USD (66% off) or equivalent amount in other currencies, and available worldwide exclusively through the App Store in the Music category. You need to be 17 years and over to download the app.
