

## WaterField iPhone Wallet Solves iPhone 7 Lightning Adapter Storage Issue

Published on 09/08/16

With their recent Kickstarter campaign launch, WaterField Designs' new Intrepid iPhone Travel Wallet solves the issue of where to store the new Apple Lightning adapter, EarPods or Bluetooth AirPods. Ideal for business travel, the Intrepid Wallet with RFID-blocking has play-through capability and keeps the iPhone 7, its accessories, a Passport, foreign currency, and other travel essentials together in one compact case. It is available as a reward via their Kickstarter campaign until September 25.

San Francisco, California - The WaterField Designs Intrepid iPhone Travel Wallet provides business travelers and early iPhone 7 adopters with a storage solution to keep track of the Apple Lightning adapter, Ear Pods or AirPods. Available now through September 25th via Kickstarter and at MSRP from the WaterField website, the Intrepid includes a play-through screen, RFID-blocking capability, storage for travel necessities - a passport, currency, cards, tickets, and a Micro Wallet, optimal for stowing the new essential Apple accessories. WaterField Designs has been designing and manufacturing custom laptop sleeves, bags, and cases for digital gear in its San Francisco studio since 1998.

"The Bluetooth-enabled AirPods, or the Lightning headphone adapter and EarPods that come with the iPhone 7, can be easy to lose or misplace," explained company owner, Gary Waterfield. "Most iPhone cases only protect the phone itself, but the Intrepid does that and much more. We designed it for business travelers with a play-through iPhone 7 compartment, storage space for travel necessities - passport foreign currency, credit and metro cards - and a Micro Wallet for coins, or the new AirPods, EarPods or Lightning adapter."

The Intrepid Travel Wallet is a custom-fitted iPhone 7 case, RFID-blocking wallet and travel pouch all in one. Two interior side pockets hold credit cards, hotel card-keys and metro tickets while its main compartment stashes domestic or foreign bills and a pen. An included zippered ballistic nylon pouch, the Micro Wallet, fits inside the main compartment and secures coins, keys or accessories like AirPods, EarPods or the Lightning adapter, a handy perk whether commuting to work or ready to doze off on an international flight. The Intrepid's custom, Ultra suede(R)-lined iPhone compartment is fronted by a play-through, scannable screen that allows users to access the phone for texts, emails and apps, and to scan a boarding pass without removing the phone from the protective case. The case is available in black or brown premium, full-grain leather.

WaterField's additional iPhone 7 case offerings include the holster-style Spinn Case and the PERALTA Abby Case for women, both of which allow for hands-free phone use, and the Finn Wallet, the Cycling Club Pouch and the Cycling Ride Pouch all of which offer phone protection and varied storage capabilities.
