

## Drop Theory is here - A Silly Dropping Physics Game

Published on 09/22/16

Texas-based Appdore, LLC today introduces Drop Theory 1.0, a minimalist object dropping physics game for iOS and Android. In this game, players must flip, drag, spin and manipulate objects to reach the drop zone. Drop Theory features over 48 unique levels with four different modes to alter the strategy of each stage. Players will be rewarded with stars as the levels are completed. There are no timers or time limits in this game, just a casual observative challenge for everyone.

Houston, Texas - Appdore, LLC today is proud to announce the release and immediate availability of Drop Theory 1.0, its latest new physics game based on the excitement of falling physics. This game was designed to be great for casual and competitive players as it has 2 leaderboards and over 10 achievements.

Drop Theory has some similarities to our popular ricocheting game, Ricochet Theory. In Drop Theory, players will start with a square and must journey across several challenging unique levels created by the Dev. Along the way, players will learn about the power of flipping, shifting, dragging and manipulating shapes and objects to complete these levels. Players will be rewarded with stars as the levels are completed.

Drop Theory features a Best of 7 Arcade mode that allows players to play 7 random levels in an attempt to get the highest score. Each of these levels will have a maximum of 10,000 points to collect but every failed drop attempt will lower the possible points to collect. There are no timers or time limits in this game, just a casual observative challenge for everyone.

This game takes place in 2018, a simplistic future that has turned complex 3D objects into flat minimalistic shapes. Players will have the opportunity to experience these challenging levels with the bouncier Circle or the dense Hexagon. Collecting all the stars will be difficult as things will be quite different when playing the game as the Circle and Hexagon.

### Device Requirements:

\* iPhone, iPad, and iPod touch

\*

\* 29.6 MB
