

CAZE introduces new Zero 5 Case for Jet Black iPhone 7/7 Plus

Published on 09/30/16

A leader in ultra slim case design, CAZE today announces the Zero 5 case for iPhone 7/7 Plus. Measuring just 0.5 millimeters, the Zero 5 is so clear and thin, the full beauty of the iPhone 7/7 Plus can be seen clearly without obscuring its sleek profile and the beautiful finish of Apple's design. Its slim, one-piece design shields your phone from scratches without adding any bulk to your iPhone 7. Zero 5 comes with a free crystal clear screen protector and a wallet size stand for iPhone 7.

Hong Kong - CAZE, the leader in ultra slim case, has announced Zero 5 case for iPhone 7/7 Plus, one of the world's thinnest clear hard cases, measuring just 0.5 millimeters. CAZE has been producing and improving the Zero 5 since the iPhone 3 release. CAZE is the first phone case maker to introduce TR-90 Memory Plastic, manufactured as a highly transparent and unbreakable hard case. The transparent and smooth finish hard case is the best companion for the new Jet Black and Matte Black colors of the iPhone 7.

The Zero 5 is a case for ultra minimalists. It is so clear and thin, the full beauty of the iPhone 7/7 Plus can be seen clearly without obscuring its sleek profile and the beautiful finish of Apple's design. Its slim, one-piece design shields your phone from scratches without adding any bulk to your iPhone 7. Zero 5 comes with a free crystal clear screen protector and a wallet size stand for iPhone 7.

Living up to its name, the Zero 5 is just 0.5mm thick. The market has been flooded with cheap, inferior plastic cases, claiming they are 0.3mm or 0.4mm thick. However, all of those 0.3/0.4mm cases are made of PP material which is matte translucent in nature. Unlike those PP thin cases, Zero 5 is made of TR-90 plastic polymer which is highly transparent, remarkably tough, highly flexible, shatterproof and highly resistant to UV damage. Besides its super slim body that measures only 0.5mm in thickness, Zero 5 is lightweight and durable and offers comprehensive protection to your iPhone. It has complete access to all the main ports and buttons of the new iPhone 7. Charging has also never been easy since you do not have to remove the case.

The weight of Zero 5 is just 6 grams so you can barely notice the change of the thickness and weight after putting on such as a slim case on your iPhone 7. Zero 5 protects the sides of the iPhone by protruding slightly above the front screen. The camera hole is specially engineered to prevent the new camera on the back from touching a flat surface when laid down. To provide further protection to your iPhone 7, a front screen film is provided.

Zero 5 can fully show off more of the new iPhone design and colors (Jet Black and Matte Black) with the minimal case design while protecting your iPhone 7/7 Plus from shocks and impacts. Aside from the clear hard case, you will get a front screen protector, a microfiber cloth and a wallet size iPhone stand.

iPhone CAZE started its business at a small shop with handmade products at the beginning and proudly released its first iPhone case in 2007. Due to the spread of word and increasing demand of overseas orders, iPhone CAZE began to take orders on its website in 2009. iPhone CAZE admires fashion, using leather, fabric, metal, polymer and swarovski crystal, to bring something luxury and special on iPhone for any occasion.
