

New Custom Photo Flashcards iPad App Reinvents Traditional Education

Published on 10/26/16

iRecognize Solutions, LLC today announces the official launch of iRecognize 2.0.6, their app for creating custom photo flashcard quizzes for iPad devices. iRecognize allows users to create quizzes intended for learning and recollection by using their own photos, text, and voice to create one-of-a-kind educational material. Unlike traditional, and often mundane testing material, iRecognize has created a unique learning environment to improve and test skills of all levels.

Bowling Green, Kentucky - iRecognize, an app for creating custom photo flashcard quizzes by iRecognize Solutions, LLC officially launches their tool for learning and recollection in the iTunes App Store. iRecognize allows users to create quizzes intended for learning and recollection by using their own photos, text, and voice to create one-of-a-kind educational material. Unlike traditional, and often mundane testing material, iRecognize has created a unique learning environment to improve and test skills of all levels.

"We noticed a gap in relatability with ordinary learning materials, so I created iRecognize to allow users to design custom quizzes using content they are familiar with; their own," says Richard Dressler, CEO of iRecognize Solutions, LLC."

iRecognize features an easily navigated user interface that allows its quiz makers and takers to instantly create a custom quiz, test their skills with one of the pre-loaded quizzes, and track their progress with the results tool.

iRecognize has an infinite amount of applications limited only by one's imagination. From introducing pre-schoolers their colors, shapes, and basic concepts, to helping students of any grade or subject prepare for a big exam. iRecognize even serves as a great tool for keeping the elderly sharp during their golden years. Users can create quizzes in any language, or combination of languages, which makes it perfect for language classes as well. Parents with special needs children will enjoy the iRecognize's customization platform that allows them to create familiar content that their child will want to engage with.

"Whether you're an adult or adolescent, we all suffer from day-dreaming, or loss of interest from time-to-time. iRecognize's use of materials that we recognize is more likely to keep the test-taker's attention over uninteresting imagery that they don't relate to," says Dressler.

Device Requirements:

* Compatible with iPad

*

* 48.0 MB
