

## **Decide-N-Dine's Restaurant Shuffle Helps Everyone Find Open Restaurants**

Published on 10/31/16

HOMic, LLC announces Decide-N-Dine 1.0.1, an update to their popular iOS app. Decide-N-Dine offers anyone a fun, fast, and aesthetically pleasing way to find open restaurants at any time. It provides a view into open restaurants in the area, along with menus, photos, contact info, and directions on how to get there. With half a million restaurants the app offers over 80 cuisines to filter by & one-by-one random restaurant ideas. Version 1.0.1 offers performance enhancements and minor bug fixes.

Chicago, Illinois - On one fall night. In some garage. Somewhere in America, a group of friends got hungry, and began the classic; "Where are we going to eat? What are we going to eat? What's open right now?" conversation. They began to search through phones, laptops, and brains for solutions, and just like every time before, they hit the wall. You know what that wall was? Hunger, anger, and disbelief that this group of friends could not find open restaurants to decide where to eat. Long story short, they ended up not going out to eat. That was the "Ah-Ha!" moment and the birth of Decide-N-Dine(TM)

"Struggling to find open restaurants and deciding where or what someone wants to eat is a universal dilemma. We also understand that the public needs an effective solution to this problem. Deciding what you want to eat and where you should eat should no longer be a universal dilemma; it is unacceptable. Those days are over and that is why we created Decide-N-Dine. We are going to bridge the gap between finding open restaurants and deciding where to eat." - Co-Founders of HOMic, LLC, Marko Maksimovic and Joseph O'Brien.

### For The People:

Decide-N-Dine is the fun, efficient, and aesthetically pleasing way for everyone to decide where or what to eat by engaging in "The Restaurant Shuffle." It provides a view into open restaurants in the area, along with menus, photos, contact info, and directions on how to get there. As a restaurant appears on the screen, users swipe right if they want more information. Swipe left, a new random restaurant will appear on the screen. Restaurants can be stored and diners need never worry about a restaurant being closed. Decide-N-Dine removes the clutter of long lists and misleading reviews and focuses on what really matters; finding where and what to eat.

### For Restaurants:

Decide-N-Dine ultimately wants to focus on daily specials and promotions that restaurants have to offer in order to provide hard to find information for customers. This is what makes us unique. We have about 500,000 restaurants in our backend, which will continue to grow every day. Our interactive platform serves as an information portal about restaurants along with a service that shines the light on one restaurant at a time. Since each restaurant is featured one at a time, it is up to the restaurant to update their specials, menus, and photos to make sure they shine the brightest.

### Device Requirements:

\* iPhone, iPad, and iPod touch

\*

\* 20.3 MB
