

## Hear My Baby Pregnancy App Hits #1 in 11 Countries on App Store Charts

Published on 10/31/16

Fat Cigar Productions Ltd today announced that Hear My Baby Heartbeat Monitor Pregnancy App has made it to number 1 on the App Store paid medical category in 11 countries, and has been the number 1 app in the UK for the last eight weeks. This unique app helps expectant mothers to simply and easily hear their baby's heartbeat by pressing the microphone from their iPhone up against their tummy. Some expectant mothers have even reported stunning results; hearing heartbeats as early as 17 weeks.

Winchester, United Kingdom - Fat Cigar Productions Ltd today is thrilled to announce that Hear My Baby Heartbeat Monitor Pregnancy App has made it to number 1 on the App Store paid medical downloads category in 11 countries, and has been the number 1 app in the UK for the last eight weeks. Some expectant mothers have even reported stunning results - hearing heartbeats as early as 17 weeks. The app now has thousands of monthly users.

### Quotes from Users:

'Fabulous...' by Nikkijp3 - "Great app, sceptical if it worked but my sister in laws mum is a mid wife and she was impressed! but you should move the record/listen button to the top of the page so it's easier to press when your bump is bigger as when you just find the beat you have to move off slightly to see where to press and record, or your belly presses it by mistake! X"

'Love this!' by CherryLipFreak - "Used this app to listen to my soon to be here Niece. It worked perfectly! My 3 and 4 year olds were amazed by hearing the baby's heartbeat. Would recommend 110%"

### Best In Class:

It is the best-in-class, pregnancy app developed for iOS devices. Beautifully designed, Hear My Baby helps expectant mothers to simply and easily hear their baby's heartbeat by pressing the microphone from their iPhone up against their tummy.

The one-touch record feature makes it simple to record once the heartbeat has been found, and then our advanced audio recording system has been engineered to specifically identify the heartbeat range of the baby and then amplify the heartbeat sound it so it can be recorded and shared via email or Facebook. This is extremely difficult to do well, and has taken considerable testing and re-engineering to perfect.

The number of weeks pregnant can be recorded and a selfie taken to remind of the time and date it was taken (and the size of the tummy!), and of course the easy share feature allows posting on facebook pages, groups or timeline. The mother's privacy is completely protected and no recordings are stored on the developers servers, meaning that unlike other apps in this category

It is a fantastic way to bond with the baby, increase the involvement for siblings, husband and grandparents. Please note, this is not a medical device and should not be considered as a substitute for medical advice or opinion. Always use the app in Airplane mode.

### Device Requirements:

- \* iPhone, iPad, and iPod touch
- \* Requires iOS 9.0 or later
- \* 14.1 MB
