

Output Factory Server for InDesign Now Supports Creative Cloud 2017

Published on 11/22/16

Zevrix Solutions today announces Output Factory Server 1.2.20, a compatibility update to its output workflow automation solution for Adobe InDesign. Output Factory Server automates printing and exporting from InDesign by processing files from hot folders. The software offers layer versioning, preflighting, variable file name, export as single pages and other powerful features. The new version makes Output Factory Server compatible with InDesign CC 2017 featured as part of Adobe Creative Cloud.

Toronto (ON) Canada - Zevrix Solutions today is proud to announce the release of Output Factory Server 1.2.20, a compatibility update to its solution to automate printing, exporting and preflighting from Adobe InDesign. Developed originally for a major magazine publisher in the United States to free up their operator computers from outputting InDesign files, the software automates InDesign workflow by processing files from watched hot folders.

The new version makes Output Factory Server compatible with the recently released InDesign CC 2017 featured as part of Adobe Creative Cloud. The update is offered free of charge to licensed users. The new version also improves the reliability of exporting InDesign documents as hi-res TIFF images on AFP network volumes.

"Output Factory Server is an extremely useful utility for a busy production facility or advertising agency", writes David Creamer in Layers magazine, "It can save lots of time - which equates to money."

Under Output Factory Server workflow, production artists, prepress operators and designers simply copy InDesign jobs to hot folders that reside on a network. Users can create hot folders for different types of output such as hi-res PDF, large format printing, EPUB files and so on. Output Factory Server offers the following key features:

- * Automate InDesign output with watched hot folders
- * Support for print, PDF, PostScript, EPS, JPEG, Flash, EPUB and other formats
- * Export InDesign documents as single pages
- * Layer versioning
- * Variable output file names
- * Preflight files before output
- * Automatic e-mail notifications
- * Serves unlimited users on a network

Pricing and Availability:

Output Factory Server can be purchased from Zevrix web site for \$699.95 (USD), as well as from authorized resellers. Trial is also available for download. BatchOutput Server users can upgrade for \$350. Output Factory Server requires macOS 10.7-10.12 and Adobe InDesign CS5-CC 2017.
