

## LinkOptimizer for Adobe InDesign Now Supports Creative Cloud 2017

Published on 11/28/16

Zevrix Solutions announces LinkOptimizer 5.0.12, a compatibility update to its workflow automation solution for Adobe InDesign. LinkOptimizer allows to reduce the size of InDesign links and speed up processing by eliminating excess image data. The software also performs image adjustments, converts file formats and helps repurpose InDesign files for web and mobile devices. The new version makes LinkOptimizer compatible with the 2017 release of InDesign CC featured as part of Adobe Creative Cloud.

Toronto (ON), Canada - Zevrix Solutions today is pleased to announce the release of LinkOptimizer 5.0.12, a compatibility update to its workflow automation solution for Adobe InDesign. Awarded 4 out of 5 stars by Computer Arts magazine, LinkOptimizer automates complex image manipulation tasks and allows to significantly reduce the size of InDesign links, save processing time and reduce production costs.

The new version makes LinkOptimizer compatible with the recently released InDesign and Photoshop CC 2017. The update is offered free of charge to licensed users. The new version also fixes an issue with processing duplicate links across multiple documents, improves handling of legacy InDesign files, fixes an error related to Photoshop sharpening filters, and offers several other improvements and fixes.

"LinkOptimizer makes me extremely happy", says Nynke Tiekstra, the owner of design studio ColtsfootMedia in Friesland, Netherlands, "It converted 10000 images in a 1800 pages project saving us at least 40 hours work, and it proved to be 100% accurate."

LinkOptimizer works automatically with Photoshop to eliminate the excess image data of InDesign links, perform essential image adjustments and convert image formats. For example, with just a click of a button users can:

- \* Scale and crop images to match their dimensions in InDesign
- \* Change their resolution to 300 dpi
- \* Convert RGB images to CMYK
- \* Resave JPEG files as TIFF
- \* Run a Photoshop action on each image

At the end of processing, LinkOptimizer reimports images to InDesign at 100% in their precise position. As a result, users can save gigabytes of disk space, accelerate document output, reduce job turnaround and cut costs through faster processing.

### Pricing and Availability:

LinkOptimizer can be purchased from Zevrix website for \$259.95 USD (Light version: \$179.95) as well as from Adobe Exchange and authorized resellers. Trial is also available for download. The update is free for LinkOptimizer 4.x users and \$130 to upgrade from previous versions. LinkOptimizer requires Mac OS X 10.7-10.12 and Adobe InDesign / Photoshop CS3-CC 2017.
