Portland, Oregon - Dejal Systems, LLC today is proud to announce the release and immediate availability of Date Stamp version 1.0, an iMessage app for iPhone and iPad. Use it to create customizable stickers, featuring a date and message like APPROVED, DUE, PAID, RECEIVED, SAVE THE DATE, SENT, and more.

Date Stamp is a standalone iMessage app; it won't clutter up your home screen, but will only appear in Apple's Messages app on iOS. Tap the stickers/apps button to the left of the text field to display the stickers and iMessage apps. Unlike a static sticker pack, you can choose a different date, select short, medium, or long date format, and change the colors of the date and design text to personalize the date stamp stickers.

Date Stamp includes a toolbar above the stickers to change the appearance. The date can be changed via a mini date picker; tap Today, or spin each of the date components to choose another date. Choose short, medium, or long date format (via buttons that show how the chosen date will be displayed). Pick a color to use for the date in the stamp. Pick another color for the rest of the stamp (the text and any frame). Then tap a sticker to insert it in a message, or tap and hold to peel it, and drag it to stick on any message bubble, optionally using two fingers to rotate or resize it as desired.

Device Requirements:

- * iPhone, iPad, and iPod touch
- *
- * 20.5 MB

Pricing and Availability:

Date Stamp 1.0 is \$1.99 USD (or equivalent amount in other currencies) and available worldwide exclusively through the App Store in the Stickers category (iMessage Store). For-review promo codes are available to the media; contact Dejal to receive one.
