

## **Baby Monitor 3G finishes a strong year with a great new update**

Published on 12/20/16

Prague based TappyTaps announces Baby Monitor 3G 4.6.0, an update to their popular parenting app for iOS, Apple TV and Android devices. A perfect gift for this Christmas, Baby Monitor 3G is a universal video and audio baby monitor for your phone, tablet, or computer. Hear every noise, stream live video, and soothe your child remotely. In addition with sharing from video feed, version 4.6.0 offers an improved dim screen on Baby Station, a new connection resolution wizard.

Prague, Czech Republic - TappyTaps is proud to announce the release of Baby Monitor 3G version 4.6.0, an update to their popular parenting app developed for iOS, Apple TV and Android devices. Baby Monitor 3G is a universal video and audio baby monitor for your phone, tablet, or computer. Hear every noise, stream live video, and soothe your child remotely.

Baby Monitor 3G works with an unlimited reach (WIFI, 3G, LTE) and trusted by more than half a million moms and dads. This is the 4th major release in this year. The whole year 2016 was a big step forward for this app, thanks to major new features:

- \* HD Video and audio helps parents to clearly listen and see their babies
- \* Lullabies put babies to sleep without an effort
- \* Every Noise enables special sensitive mode, so even the quietest noise (like baby breathing) is transmitted to the parent station
- \* Apple TV & Android TV version

"At the beginning of 2016, our app was selected as recommended parenting app by Apple and was already #1 baby monitor app in most of App Stores all over the world. But this doesn't stop us from bringing new improvements", said Jindrich Sarson, CEO of TappyTaps.

The Christmas update also packed one beautiful gift. The Snapshot takes a photo at any time the parent wants to during the video monitoring. They can save the precious moment or share it with the world via social networks. They can also use a sticker and turn their baby into a little Santa Claus.

### Supported Languages:

Baby Monitor 3G supports English, French, German, Czech, Spanish, Dutch, Italian, Russian, Korean, Japanese, Swedish, Polish, Finnish and Portuguese languages.

### Device Requirements:

- \* iPhone, iPad, and iPod touch
- \* Supports Apple TV
- \* Requires iOS 8.0 or later
- \* 53.3 MB

### Pricing and Availability:

Baby Monitor 3G (v4.6.0) is \$3.99 USD (or equivalent amount in other currencies) and available worldwide through the App Store in the Lifestyle category. There is also an Android version available on Google Play. For more information or promo codes, please contact Adam Ludvik.
