

TimeTag 5.0 for macOS released - A redesigned, simple time tracking app

Published on 01/04/17

Dallas based Capparsa Inc. today releases TimeTag 5.0, their popular multiplatform, syncing enabled time tracking solution for macOS. Focused exclusively on helping you achieve your goals, TimeTag is a great tool for freelancers & achievers who want to stay focused on their work, not their tools. It features a simple interface, including the "Big Green Button" to help you start and stop timers with ease. Version 5.0 is more accessible than ever introducing many new features.

Dallas, Texas - Capparsa, Inc today is pleased to announce the immediate availability of TimeTag 5.0 for macOS. Available for both macOS and iOS, TimeTag is a multiplatform, syncing enabled time tracking tool that is focused on helping you achieve your goals. It features a simple interface, including the "Big Green Button" to help you start and stop timers with ease. Using a custom syncing backend, TimeTag keeps data in sync across any number of devices that have it installed.

New Design:

The new design features a big, bold header that always shows you the hours logged and amount earned for your visible records. The timers have been trimmed down to let you use the app in a new "timer only" mode that takes up only a little of your screen. Managing tags and categories have gotten easier to access right from the timer window, and now you can edit hours directly without having to do any date math.

New Pro Features:

Those who purchase the new TimeTag Pro subscription (USD \$3.99/month or \$39.99/yearly) gain access to a wide range of features like syncing and Dashboard access, and can fully unlock Pro features on their iOS devices without any additional purchase. There, they gain access to PDF reports, automatic location-based timers, custom exported reports and calendar record importing. TimeTag Pro subscriptions also come with a free trial period.

The new Dashboard area shows you interactive pie charts of your tags (thought of as activities) and categories (thought of projects). It also shows amount earned across time, as well as an 'insights' area that shows key numbers and averages for your data. If you have multiple Apple devices, including iOS and macOS devices, then TimeTag Pro will keep all your devices in sync and keep your records in the cloud for you to access anywhere.

Time tracking to help you achieve more. With these features and more, TimeTag is a great tool for freelancers, contractors, indie professionals and achievers everywhere to organize their time and focus on their work:

- * New, smaller design to take up even less space on your screen when you work
- * Big bold headers and records screen showing total hours, amount earned, number of records, and more information at a glance
- * Featuring "Big Green Button", it's never been easier to start and stop timers to create time sheets easier
- * For Pro users, custom syncing backend, dashboard access, and full Pro access on your iOS devices
- * Export records to CSV or HTML
- * Filter records by start/end date, tags and/or categories
- * Available for both iOS and macOS devices
- * Works offline and online
- * Supports full screen and split screen mode natively
- * Menu bar access available to start/stop timers quickly
