

Eltima announces Folx PRO pre-order campaign

Published on 10/19/09

Eltima Software today announces the forthcoming Folx release and starts pre-order campaign. Get Folx PRO license with 50% discount. Folx is a handy download manager for Mac

which provides you with various options to manage your downloads. Folx transparently splits your downloads into multiple threads downloaded simultaneously, and increasing your download speed significantly.

Bellevue, Washington - Eltima Software, global Software Development Company, announces the forthcoming Folx release and starts pre-order campaign - get Folx PRO license with 50% discount! Folx is a handy download manager for Mac which provides you with various options to manage your downloads. Folx transparently splits your downloads into multiple threads downloaded simultaneously, thus increasing your download speed significantly.

Whenever your Mac loses Internet connection, Folx will automatically resume downloading, not losing a single byte of the download task. Folx also features a powerful scheduler which lets you automate your download activity. With Folx you can assign tags to your downloads, therefore the latter are sorted and categorized by these tags automatically.

You can also use Folx as your torrent client. Folx is currently in beta stage, but will be officially released in the nearest future. Folx will be offered in two editions - Free and PRO. With PRO version you can search for torrents directly from Folx app, so no need to browse through various torrent trackers one by one, and download speed will be automatically managed by Folx cool option - Smart Speed Adjustment. PRO version will be distributed for fair \$19.95 (USD).

Starting from October, 13th and until the official release of Folx, Eltima announces Folx pre-order campaign! You have a great opportunity to get this handy download manager for Mac at half-price! Pre-order Folx PRO today for \$9.95 only. Order Folx PRO now and save 50% of its after-release \$19.95 price! Folx is compatible with Mac OS X 10.4, 10.5 and 10.6 32-bit.
