

## Pumpic Introduces Control Panel App for iOS

Published on 01/24/17

Developer of mobile parental monitoring software, Pumpic has launched a Control Panel app for iOS, a supplementary tool to the company's comprehensive tracking platform. With a focus on minimalism and providing only the most crucial surveillance data, the app's functionality is limited to avoid too much information piling. The full monitoring information collected by Pumpic from the tracked device is available in the standard web-based Control Panel.

Overland Park, Kansas - Pumpic, the developer of mobile parental monitoring software, has launched a Control Panel app for iOS. From the moment of Pumpic launch, the ability to instantly keep tabs on the most popular communication channels has been one of the highly demanded features by Apple devices users. Now, with a designated app available at the AppStore free of charge, staying aware became as effortless as it only gets.

The iOS Control Panel app was developed as a supplementary tool for Pumpic mobile monitoring software. With a focus on minimalism and providing only the most crucial surveillance data, the app's functionality is limited to avoid too much information piling. The full monitoring information collected by Pumpic from the tracked device is available in the standard web-based Control Panel. It can be accessed via any browser at any moment. Currently, Pumpic Control Panel app for iOS supports the following features:

- \* Calls monitoring
- \* Text messages reading
- \* Location and routes tracking
- \* Browser history checkup
- \* Contacts viewing
- \* Remote device reboot or lock (for Android target devices)

As the CP app is an additional appliance to enhance the consumer experience, its users must be Pumpic customers. They need to have Pumpic set up on the target device and possess active Pumpic subscription.

About Pumpic:

Pumpic is the mobile monitoring software designed for parents. Thanks to dozens of tracking features, it provides access to the comprehensive information about kids' activities on mobile devices:

- \* Communications - calls, SMS, MMS, iMessages, instant messengers, email
- \* Internet activity - browsing history, bookmarks, social media
- \* Location data - current whereabouts, the entire route history, geofences
- \* Other data - contacts, notes, calendar, etc.

With Pumpic, a parent can monitor kids' communications, Internet activity, location data, contacts, notes, calendar, etc. Thus, we empower parents to spot the early signs of a potential threat and take measures to protect their kids from cyberbullying, sexting, online predators' attacks, etc. Ideally, you can avert the danger or at least minimize the consequences if something adverse nonetheless happened. Put simply, the app makes moms' and dads' lives a bit easier.

Device Requirements:

- \* iPhone, iPad, and iPod touch
- \* Requires iOS 8.4 or later
- \* 15.3 MB

Pumpic is a team of talented designers and developers, who joined forces to introduce unique and user-friendly mobile monitoring solution. We strive to make the world a safer and, hence, a better place to live in for kids and teens. Pumpic's main focus is providing parents with the knowledge of who reaches out to their children and what for, what they do online, or where they are at any particular moment. With Pumpic, a parent can monitor kids' communications, Internet activity, location data, contacts, notes, calendar, etc. Thus, we empower parents to spot the early signs of a potential threat and take measures to protect their kids from cyberbullying, sexting, online predators' attacks, etc. Ideally, you can avert the danger or at least minimize the consequences if something adverse nonetheless happened. Put simply, the app makes moms' and dads' lives a bit easier. Copyright (C) 2017 Pumpic. All Rights Reserved.
