

## Elmedia Player - Multiformat app gets new features and improvements

Published on 02/02/17

Frankfurt based Eltima Software today announces Elmedia Player version 6.7, an important update to the company's popular multiformat video player for OS X. Elmedia Player works with a large variety of file types including uncommon ones. One can create playlists and manage them, adjust playback settings, and much more. The app has been translated to new languages, now features VobSub subtitles support for AirPlay streaming and got some necessary improvements.

Frankfurt, Germany - Eltima Software today is proud to announce the release and immediate availability of Elmedia Player version 6.7, the company's popular multiformat video player for OS X. With vast support for different file types, one can play AVI, FLV, SWF, WMV, MOV, MP4, MP3, DAT, FLAC, M4V, MPG, MKV, and more. Multiple audio tracks are supported, even the external ones, as well as different types of subtitles.

Elmedia Player offers such essential conveniences as float on top option; easily switch to and from the full screen mode, and can fit the image to screen. This new version also adds support for macOS native full-screen mode. Playlist creation and management is very simple. Elmedia Player also has a variety of settings that can help improve video image and sound quality: adjustable playback speed; syncing subtitles and audio with video; flexible audio tuning with the graphic equalizer; video color settings; the image can be flipped, mirrored, rotated in any direction, and reverted to original. Also this multiformat video player can make screenshots of any moment in the movie as well as convert the whole movie into the series of images.

Elmedia Player supports AirPlay both directions; can either stream or receive content. A new addition for Elmedia AirPlay functionality is the support for VobSub (.sub/.idx) subtitles for streamed videos. Some AirPlay issues also got fixed, like image not being displayed when streaming certain videos. For international users, Elmedia makes usage simple by adding new localizations all the time. This update adds Swedish, Korean, Polish and Italian localizations.
