

Output Factory for Adobe InDesign at 50% off on BitsDuJour: March 21-22

Published on 03/21/17

Zevrix Solutions announces that its Output Factory for Adobe InDesign is available at 50% off on the software discount website BitsDuJour until March 22 only. Output Factory automates printing, exporting and preflighting from InDesign and offers batch output, export as single pages, variable file names, layer versioning, FTP delivery, detailed history and more. The software is designed to automate and simplify workflows of printers, prepress bureaus, ad agencies and publishing houses.

Toronto (ON) Canada - Zevrix Solutions today is pleased to announce that its Output Factory for Adobe InDesign is available at 50% off on the software discount website BitsDuJour until March 22 only. Output Factory lets printers, ad agencies and publishing houses worldwide automate and simplify their printing and exporting tasks, as well as easily repurpose InDesign files for the web and mobile devices. The offer lets users save \$85 on each copy of the software.

"Output Factory has been the single biggest time-saver I've encountered in ten years of print production," says Mike Agate, Head of Production of Which?, Europe's largest consumer rights organization. "Easily saves hours a week, producing bullet-proof documents over and over... With the reduction in head count and efficiency savings, it must have paid for itself 500 times over."

With Output Factory, users only need to queue the desired InDesign files and select output options, and the software will automatically print the files or save them to PDF or other formats. Output Factory can automate processing of hundreds of documents in the background while freeing users time for other important activities and eliminating repetitive tasks. Output Factory supports printing as well as exporting to PDF, PostScript, EPS, Flash, INX, IDML, EPUB and several image formats. It offers the following key features:

- * Batch printing and exporting of InDesign files
- * Export as single pages
- * Output to several formats with one click
- * Layer versioning: output layer combinations as single files
- * Variable output file names
- * Include InDesign text in file name
- * Preflight InDesign documents and skip the ones with errors
- * Send output files to FTP, Amazon S3 and other servers

Pricing and Availability:

Output Factory can be purchased from BitsDuJour at 50% off for \$84.97 (USD) on March 21-22 only. Trial is also available for download. Output Factory requires macOS 10.7-10.12 and InDesign CS3-CC 2017.
