

MacX MediaTrans 3.5 Gets A Fresh Face for the Easiest iOS Data Transfer

Published on 03/24/17

MacXDVD Software today is excited to offer its newly-improved version of MacX MediaTrans 3.5, featuring a striking new user interface to enhance the user experience. MacXDVD brings the most extensive data transfer between computer and iDevices on all iOS versions. The redesigned UI will allow improved responsiveness, extensive usability and cleaner navigation, empowering users to transfer movies, videos, songs, iTunes purchases and other data between iDevices and Mac, quickly and easily.

Chengdu, China - MacXDVD Software has announced the general availability of the latest MacX MediaTrans 3.5 featuring an all-new user interface (UI). MacX MediaTrans is a reliable iPhone manager that enables free data transfer between iDevices and Mac computer that covers movies, TV shows, photos, books, iTunes purchases and more. With simplicity in mind, the new user interface is optimized to allow for easy navigation and an enhanced user experience.

MacX MediaTrans V3.5 now supports the latest iTunes 12.6 and iOS 10.3, get the fresh new look at MacX MediaTrans official page.

MacX MediaTrans is known for being a reliable iOS data management solution that focuses on making iDevices users' data transfer experience more accessible and intuitive. It has received a tremendous response with up to 80% high adoption and its latest-added ability to transfer iTunes purchases and convert M4V/M4P into MP4/MP3 has become a smash hit. iDevices users who use iTunes willy-nilly now have a much enjoyable experience to freely transfer content cross devices, backup iPhone files, mass delete camera roll photos and other media, manage iOS files, free up iDevices' space and etc.

The new MacX MediaTrans UI is designed to further simplify the operation, improve usability and increase accessibility. "A holistic approach is taken to redesign the new user interface," said Jack Han, CEO of MacXDVD Software, "after working with our customers to best understand their preferences, we have created a completely new UI to allow a more natural navigational experience. Now MacX MediaTrans 3.5 is not only the most comprehensive iPhone data transfer solution available; it is also the most productive, with layout that brings functions to the surface in a more attractive, visually stunning and intuitive way."

- * Visually modern and appealing interface- completely redesigned UI delivers rich colors and modern elements to ensure a more appealing look and feel
- * Fast access to functions- the brand new design ensures the users are always close to what they need, which drastically reduce the number of clicks and significantly improve work efficiency
- * Optimized user experience- the streamlined navigation provides clear button layout, features simplified access to frequently used functions, and brings relevant content quickly

Other improvements include:

- * Fully support the latest iTunes 12.6
- * Fully support iOS 10.3 supported devices
- * Optimize the capability to delete photos in Camera Roll
